TECHNICAL MAINTENANCE PRODUCTS, INC.

FRONT PANEL

INSECTICIDE FF

Kills

Roaches, flies, mosquitoes,
gnats, waterbugs, fleas,
silverfish, clothes moths.

CAUTION

KEEP OUT OF REACH OF CHILDREN. Harmful
if swallowed; avoid contamination of
food stuff. Keep away from open fire
and open flames.

ACTIVE INGREDIENTS:

	100.00%
Pyrethrins	0.127
Technical piperonyl butoxide*	0.254
N-octyl bicycloheptene dicarboximide	0.422
Petroleum distillate	99.197

*Equivalent to .2032% (butylcarbityl)
(6-Propylpiperonyl) ether and .0508 related compounds

DIRECTIONS FOR USE IN HOMES AND INSTITUTIONS

TO KILL FLIES, MOSQUITOES AND GNATS:

Close doors and windows directing spray up toward ceiling. The room should be filled with mist and remain closed for 10-15 minutes. Sweep up dead or stupified insects and destroy them.

To kill roaches, waterbugs and silverfish:

Spray liberally on these insects and around refrigerators, sinks, all cabinets, around pantry shelves, into all cracks and crevices in moulding and woodwork, pipe openings in walls and floors or wherever these insects are likely to hide. Repeat treatment monthly.

TO KILL ANTS: Use the spray so as to wet as many insects as possible, paying particular attention to nests and runways. Repeat treatment as often as is necessary.

TO KILL BEDBUGS: Bedsteads should be sprayed thoroughly in all corners, cracks, and crevices. Springs and mattresses should be sprayed thoroughly after the bed is dismantled, paying particular attention to the cracks, crevices, tufts, and seams on the mattresses, wall-paper that is loose, loose moulding and anyplace where bugs may hide. Repeat treatment as often as necessary.

TO KILL CLOTHES MOTHS AND CARPET BEETLES: Take special precautions with cracks in floors and infested areas of carpets as well as cracks in flooring under carpets and openings below baseboards to see that they are thoroughly wetted with spray liquid. Wool lint and organic matter accumulating in these places will serve as breeding materials for such pest. Clothing to be stored should be cleaned, aired and sprayed carefully from a distance of two feet, taking care to see that seams and folds are wetted. Chests in which woolens are to be stored should be thoroughly sprayed before being filled with clothes. Closets should be sprayed liberally at least twice a month, directing the spray on the garments.

TO KILL FLEAS: Liberally spray all infested places - rugs and under rugs, basements, porches, and wherever pet animals make their beds. Spray bedding of household pets. Do NOT spray animals directly. Repeat as required.
