**DIRECTIONS FOR USING**

The refreshing aroma of the southern pine woods and an attractive rich, white emulsion when diluted with water.

It is manufactured to meet the most exacting requirements where an exceptionally fine product is desired.

Manufactured with pure steam distilled pine oil—Easy to use.

Minimum Phenol Coefficient of 6 by AOAC Method.

**DILUTION**

EXTRA FINE PINOLA-AA DISINFECTANT has been tested by the A.O.A.C. Use Dilution Method using *S.choleraesuis* 1:100.

For disinfecting and cleansing hard surfaces such as walls, tables, floors — use 1 part of EXTRA FINE PINOLA AA to 100 parts of water. When preparing the solution, pour the disinfectant into the receptacle first, then add water and stir well. Lukewarm water gives the best results. Never use boiling water.

**APPLICATION**

It is recommended to wet all surfaces thoroughly, apply the disinfectant solution with a mop but can be used with rags or cloths. When used according to direction, EXTRA FINE PINOLA will disinfect, clean and eliminate odors.
