**DIRECTIONS**

For an initial application use one gallon of this algicide per 15,000 gallons of water. Use one quart per 50,000 gallons of water every fifth to seventh day depending on weather and use factors.

The initial dose is used when filling pool at beginning of swimming season and in a clean pool free of visible algae. If pool has visible algae growth treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of algae, use recommended maintenance dose.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into the several areas of the pool. Reapplication is recommended only when necessary to assure rapid dispersion.

**TO DETERMINE POOL CAPACITY**

**Rectangular Pools** - Length times width times average depth in feet times 7.5 equals gallons.

**Round and Oval Pools** - Average diameter times average diameter times average depth in feet times 5.9 equals gallons.

This algicide is formulated to complement a chlorine water being treated with bromine. Chlorine is the primary, specific effect against growth of algae and other aquatic plants in maintaining pool water. In the past, the reduced effectiveness of this algicide has been attributed to the total chemical treatment system.

# PURICIDE ALGICIDE INHIBITOR

**Active Ingredients:**

Alkyl (C14, 58%; C16, 28%; C12, 14%)  
dimethyl benzyl ammonium chloride . . . . . 10%

**Inert Ingredients:** . . . . . 80%

## DANGER

**KEEP OUT OF REACH OF CHILDREN**

(See first aid statement & other precautions on back panel.)

This algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form this chemical should not come into contact with high concentrations of chlorine. **DO NOT MIX THIS ALGICIDE AND CHLORINE TOGETHER** when adding to the pool. These chemicals should be handled separately.

This algicide is economical, efficient, stable.

**DANGER: Keep Out of Reach of Children** Corrosive. Causes eye damage and skin irritation. Do not get in eyes or on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, or other solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**NOTE TO PHYSICIAN:** Probably mucosal damage may be obtained; the use of gastric lavage. Measures against respiratory, bronchospasms, depression and convulsion may be needed.

For complete information, thoroughly read the back panel.
