FOR THE CONTROL OF SUBTERRANEAN TERMITES: First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundation dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Dilute concentrate at a rate of 4 tablespoons (2 fl. oz.) per gallon of water and use at a rate of 4 gallons of solution per 10 linear feet per foot of depth. Apply half of this to the back fill. Make wise treatment inside of foundations of crawl-space buildings. Cover treated soil with a thin layer of untreated soil.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR USE

Do not use, spill or store near heat or open flame.

PHYSICAL OR CHEMICAL HAZARDS

This product is toxic to fish, birds and other wild life. Keep out of any body of water. Do not contaminate water used for irrigation or domestic purposes. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

ENVIRONMENTAL HAZARDS

Harmful if swallowed. Avoid breathing of spray mist. Avoid contact with skin, eyes or clothing. Wash contaminated skin promptly with soap and water (contact with skin may cause toxic symptoms). For eyes, flush with plenty of water. Get medical attention if irritation persists. Avoid contamination of food and feedstuffs. Keep children and animals off treated areas until these areas are dry. This product is highly toxic to bees exposed to direct treatment or residues on flowers and plants.

CAUTION

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

NOTICE: Buyer assumes all risks of use, storage and handling of this material not in strict accordance with directions given herewith.

Storage: Store in a cool place away from heat or open flame, keep out of reach of children.  
Disposal: Do not reuse empty container. Wrap empty container and put in trash collection.

STORAGE AND DISPOSAL (10-7)

Retreatment may be made to critical areas in accordance with the applications techniques described above. This application should be made as a spot treatment to these areas. Routine retreatment of the entire premises should be avoided.

Retreatment for subterranean termite should only be made when there is evidence of re-infestation subsequent to the initial treatment or there has been a disruption of the chemical barrier in the soil due to construction, excavations, landscaping, etc.

Refer to Federal, State and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excavation saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: Do not apply under pressure. Soil should be removed to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four hours then returned to the trench which has been lined with 4 mil plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

Attention: Reynaldo Sanabria

Gentlemen:

Subject: Termiticide I.I.P.  
Chacon 50% Chlordane Spray  
EPA Registration No. 5719-24  
Your Application of February 17, 1982

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

At the next label printing, incorporate the following revisions:

1. On the front panel, there should be a Statement of Practical Treatment which should read:

STATEMENT OF PRACTICAL TREATMENT

- IF swallowed - Call a physician or Poison Control Center immediately. Gastric lavage is indicated if material was taken internally. DO NOT INDUCE VOMITING; vomiting may cause aspiration pneumonia.
- IF inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.
- IF on skin - Remove contaminated clothing and wash affected areas with soap and water.
- IF in eyes - Flush eyes with plenty of water. Get medical attention immediately.

2. The heading to the specific use directions should read:

Subterranean Termites - Directions for Homeowner Use  
Termite Control in Existing Structures  
Buildings with Basements or Crawl-Spaces

3. Delete "Keep children and animals off treated areas until these areas are dry. This product is highly toxic to bees exposed to direct treatment or residues on flowers or plants." Also delete the "if in eyes" statement since is part of the statement of practical treatment.

Since this product is subject to the child-resistant (special) packaging regulations, submit a signed certification statement that the packaging complies with these requirements.

Refer to 40 CFR 162.16 "Pesticides Requiring Special Packaging" and the Federal Register Vol. 46, No. 41, Tuesday, March 3, 1981, pps. 15104-15109, "Clarification of Policy Issues on Special Packaging," for guidance and proper submission requirements.

Sincerely yours,

George T. LaKocca
