### CHACON FRUIT AND VEGETABLE SPRAY

Read entire label carefully and re-use as directed. Do not combine with other directions.

#### DIRECTIONS

Apply when insects or damage occur. Repeat at 7 to 10 day intervals, as necessary. Do not use more than 100 gallons of diluted spray per acre.

**VEGETABLES:** Use 3 tablespoons per gallon of water to control Leafhopper on Tomatoes and leafy vegetables, Flea Worm and Melonworm on Cucumbers, Squash, Pumpkins, Melons, Eggplant, and leafy vegetables. Do not use within 7 days of harvest, except on leafy vegetables, within 14 days.

Use 6 tablespoons per gallon of water to control Tomato Hornworm, Tomato Fruitworm, Lace, Stink and Tarnished Plant Bug, Cucumber and Flea Beetles, Leafhoppers, Squash Bugs, Aphids, Imported Cabbage Worm, Looper, Red Spider Mite, Armyworms on Tomatoes, Egg Plant, Pepper, Cucumber, Squash, Pumpkin, and Melons. For the control of Corn earworms, apply this product as they appear. Make 3 to 4 applications at 7 to 10 day intervals. Infestation warrants. Re-apply immediately after the application of this product to the tassel region of corn. The application period will seriously reduce bee population. Do not apply within 14 days of harvest. On Head Lettuce, Carrots, Parsnips, and Cabbage, Cauliflower, Brussels Sprouts, Do not use within 7 days of harvest. On leafy vegetables, Kale, Spinach, Swiss Chard, Do not use within 14 days of harvest. Same on Beans and Turnips when tops are to be used as food. Use 6 tablespoons per gallon of water for control of Leafhopper, Grasshopper, Armyworms, Stink and Tarnished Plant bugs, Cutworms, Looper, Flea and Cucumber Beetles, Beans, Peas and Corn. Do not use within 7 days of harvest.

**FRUIT:** Use 6 tablespoons per gallon of water to control Coddling Moth on Apples, Pears and Walnuts. Control of Apple Moth, Apple Maggot, Oriental Fruit Moth, or Pear Maggot. Apply at petal fall and every 14 to 14 days thereafter until control is achieved.

Do not apply within 7 days of harvest. For Peach  
sprays apply 2 or 3 sprays to trunk, from ground to scaffold  
level with moth flight.

1/2 teaspoons per gallon of water to control Codling Moth on  
Apples, Pears, and Walnuts. For the control of Apple Moth, Apple  
Bristle Fruit Moth, or Plum Curculio. Apply at petal fall  
10 to 14 days thereafter until control is achieved.

Control Beetles, Leaf Rollers, Weevils on Strawberry, Boysenberry,  
Blackberry. Do not use within 7 days of harvest except  
on Strawberry, within 3 days.

Harmful if swallowed, inhaled, or absorbed through the  
skin. Do not take internally. Skin contact may be harmful. Avoid  
contact, wash hands and face before eating or smoking. Wear  
protective clothing. Avoid contamination of food.

Product is highly toxic to bees exposed to direct treatment or  
drift on crops. Protective information may be obtained from  
Cooperative Agricultural Extension Service. Do not use on  
crops or other uses not covered by this label. Do not leave  
equipment in sprayer. Do not spray indoors.

Product is toxic to fish. Keep out of lakes, streams or ponds.  
Do not apply where runoff is likely to occur. Do not apply when  
conditions favor drift from areas treated. Do not contaminate  
equipment during cleaning of equipment, or disposal of wastes. Apply this  
product only as specified on this label. Do not reuse containers.

**—FLAMMABLE! KEEP AWAY FROM HEAT OR OPEN FLAME.**

Product is a cholinesterase inhibitor and can cause symptoms  
similar to those caused by organic phosphate compounds. If poisoning  
occurs, call a physician immediately. Atropine is antidotal.

**PHYSICIAN:** Carbaryl is a moderate, reversible, Cholin-  
esterase inhibitor. Atropine is antidotal.

Buyer assumes all risks of use, storage or handling of this  
product if not in strict accordance with directions given herewith.
