CHACON VEGETABLE AND TOMATO INSECT SPRAY

Read entire label carefully before using. Use only in accordance with label cautions and directions. **SHAKE WELL BEFORE USING.** Always hold in upright position and point valve opening away from face.

DIRECTIONS

For best results, spray in early morning or late evening when air is still. Use slow sweeping motion, holding the dispenser approximately 2 feet from foliage. Use short burst, no longer than one second. Spray rows at the rate of one foot per second, ensuring that both sides of the leaf are treated. For heavy growth, spray rows on both sides. Spraying should begin when insects first appear and repeat as needed or after rain. Contact insects directly, if possible. To prevent possible plant injury, avoid visibly wetting foliage and avoid using in hot, bright sunshine.

Do not apply within 24 hours before harvest. Wash vegetables and fruit before eating.

SPRAY CHART
