All surfactants used in this product are biodegradable.
This product does not contain phosphorus
compounds. Composition complies with
EPA testing procedures for a fungistatic film.

EPA Registration No. 5736-56
EPA Est. No. 5736-OH-1

Not Reviewed. Registration of this product is in accordance with

Product No. 22452

FUNGISTATIC BARRICADE

fungistatic barrier agent

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

The surfaces should be clean and reasonably dry. FUNGISTATIC BARRICADE is best applied with a pressure spray tank with a 500 nozzle and a 15 to 20 psi tank pressure. Apply a continuous film, saturating the surface from top to bottom. It also can be brushed or wiped on equipment or dipped if necessary. The amount should be the minimum to accomplish the desired effect. FUNGISTATIC BARRICADE should be diluted 1:1 for application but if desired it can be applied undiluted. However, any material in the area must be removed during coating application to prevent foodstuff contamination. Ventilation must be maintained to prevent odor transfer.

FUNGISTATIC BARRICADE can be diluted 1 to 1 with water for application to troublesome mold growth areas in food and beverage plants; primarily walls and ceilings. FUNGISTATIC BARRICADE should be applied only to non-food contact areas. When dried to a firm coating (usually 30 to 60 minutes), FUNGISTATIC BARRICADE will inhibit the growth of mold and fungus and also act as a soil release film. In high humidity areas, a longer drying time may be needed. Adequate ventilation must be maintained during spraying to remove volatile components of product.

The coverage for FUNGISTATIC BARRICADE when diluted 1:1 is 800 square feet per gallon.

Precautionary Statements

Hazards to Humans and Domestic Animals.

KEEP OUT OF REACH OF CHILDREN.

DANGER:

Irritant. Flammable. Irritates skin and irritates eyes. Do not get in eye or on skin or on clothing. Protect eyes and skin when handling. Harmful or fatal if swallowed. Avoid contamination of food.

STATEMENT OF PRACTICAL TREATMENT: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, CALL A PHYSICIAN. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of water. Avoid alcohol. CALL PHYSICIAN IMMEDIATELY.

ENVIRONMENTAL HAZARDS: Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES permit. For guidance contact your Regional Office of the EPA.

PHYSICAL HAZARDS: Do not eat, spill or store near food or open flame.

STORAGE AND DISPOSAL

- Do not contaminate water, food, or feed by storage or disposal.
- Open dumping is prohibited.
- Do not reuse empty container.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or residue is a violation of Federal law. If this waste cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at your EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling if recertification, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke. **GENERAL:** Consult to local, state or local disposal authorities for approved alternative procedures such as limited open burning.
