HOT SHOT FLY AND MOSQUITO INSECT KILLER

When used as directed is a highly effective insect killer. It is recommended as a space spray for use in restaurants, hospitals, food storage warehouses, hotels, and especially for household use. It provides fast knock-down for mosquitoes, houseflies, gnats, and flies.

DIRECTIONS

Hold on upright, point valve opening away from face. Press valve to spray. When used in an enclosed area, do not remain in the treated area or ventilate the area after treatment is completed.

TO KILL HOUSEFLIES, BITING FLIES, MOSQUITOES, GNATS, MIDGES, and FLYING MOTHS Close doors and windows. Spray freely toward ceiling in all directions. Spray directly on as many insects as possible. Leave room closed 10 to 15 minutes. Repeat as necessary.

TO KILL ROACHES, ANTS, EARWIGS, GRAIN MITES, SOWBUGS, SPIDERS, and CENTIPEDES Spray thoroughly on infested areas and directly on as many insects as possible. Spray into cracks and crevices. Spray ant trails and areas where these pests enter premises. Spray top surfaces and undersides of carpets and rugs. For long lasting results against crawling bugs use HOT SHOT ROACH and ANT BUG KILLER in accordance with directions on its label, but not in the products areas of food processing plants.

OUTDOORS TO CONTROL NUISANCE PESTS BITING FLIES, MOSQUITOES, GNATS, MIDGES, and FLYING MOTHS Spray in general area of outdoor activities, on chairs, tables, around and in curtains and on to reduce annoyance. Allow spray to dissipate before re-entering treated area. Repeat as necessary.

WASPS and HORNETS Apply to areas where they are nesting or flying. For best results spray directly on the nest or on the insects. Repeat as necessary.

CAUTION Keep out of reach of children. Do not spray directly on food dishes, eating utensils, or clothing. Do not use on painted products unless they are protected from direct contact with food processing areas. Do not breathe directly from the spray during treatment. All food processing plants should be sprayed thoroughly and cleaned before use. Remove pests from premises before use. Keep away from the area to be treated until after the product has dried. Do not spray children or animals. Do not use where temperature will exceed 120°F. Do not use near open flame or gas range.

ACTIVE INGREDIENTS

1,1-Dichloro-2,2-bis(4-chlorophenyl)ethane	0.21%
1,1-Dichloro-2,2-bis(4-chlorophenyl)ethane	0.034%
