HOT SHOT HOUSE and GARDEN PEST KILLER

When used as directed is a highly effective insecticide for both indoor and outdoor use.

DIRECTIONS

Hold in upright position with opening away from face and press valve to spray. When used in an enclosed area, do not remain in the treated area and ventilate the area after treatment is completed. Do not use on edible plants.

OUTDOORS TO CONTROL ORNAMENTAL PLANT PESTS TO KILL APHIDS, ADULT WHITEFLIES, EXPOSED THRIPS, JAPANESE BEETLES, LEAFHOPPERS, MIMOSA WEBWORM LARVAE, PLANT BUGS, and SPITTLEBUGS ON ORNAMENTAL PLANTS: Direct spray with sweeping motion, holding can 18 to 24 inches away from plants. Do not wet, as the effective formula kills when sprayed lightly. Use spray when air is still, preferably cloudy days and evenings. Repeat as necessary.

OUTDOORS TO PROTECT ORNAMENTAL EVERGREENS, DECIDUOUS TREES and SHRUBS: Spray at rate of one foot per second. For heavy growth, it may be necessary to spray from both sides. Repeat as necessary.

OUTDOORS TO PROTECT FLOWER GARDEN PLANTS: Spray when infested according to directions listed above. Use caution on tender plants. Repeat as necessary.

OUTDOORS TO CONTROL NUISANCE PESTS BITING FLIES, MOSQUITOES, GNATS, MIDGES and FLYING MOTHS (MILLERS): Spray in general area of outdoor activities, on chairs, tables, ground, and in surrounding air to reduce annoyance. Allow spray to dissipate before occupying treated area. Repeat as necessary.

WASPS and HORNETS: Application should be made in late evening when insects are at rest. Spray liberally, containing and breeding places, containing as many insects as possible. Repeat as necessary.

INDOORS FOR ORNAMENTAL HOUSE PLANTS TO KILL APHIDS, ADULT WHITEFLIES, EXPOSED THRIPS, JAPANESE BEETLES, LEAFHOPPERS, MIMOSA WEBWORM LARVAE, PLANT BUGS, and SPITTLEBUGS ON ORNAMENTAL PLANTS: Hold can 18 to 24 inches away from plants and spray the under-bursts, top and underneath leaves. Do not wet. Use caution on tender plants. Repeat as necessary.

INDOORS TO KILL HOUSEFLIES, BITING FLIES, MOSQUITOES, GNATS, MIDGES and FLYING MOTHS (MILLERS): Close doors and windows. Spray liberally, ward setting to all directions. Spray directly on as many insects as possible. Leave room closed 10 to 15 minutes, ventilate room thoroughly after treatment. Repeat as necessary.

INDOORS TO KILL ANTS, ROACHES, EARWIGS, GRAIN MITES, SOY BEANS, SPIDERS and CENTIPEDES: Spray baseboards, moldings, crevices and joints on other infested areas. For longer lasting results against crawling bugs, use **HOT SHOT ROACH and ANT BUG KILLER** according to the directions on its label.

CAUTION: Keep out of reach of children. Do not spray plants when temperature exceeds 90° F. Do not spray directly on food dishes or kitchen utensils. Avoid contamination of food and drink. Use cover or remove fishbowl from the area to be treated.

WARNING: Contents under pressure. Do not place container on stove or radiator or where temperature will exceed 120° F. Do not put fire or other container in fire.

ACTIVE INGREDIENTS: 1,1,1-Trichloro-2,2,2-trifluoroethane 35.0%, 2,2-dimethyl-3,2-methylpropane (isobutane) 4.8%, Residual Compounds 0.48%, Aromatic petroleum hydrocarbons 0.464%,
INERT INGREDIENTS: 99.138%, 100.000%

*Cis-trans isomers of 1,1-dichloro-2,2-difluoroethane and methyl bromide.
U.S. Patent No. 3,445,007 is granted to Conwood Corporation.

MONEY BACK GUARANTEE: Guaranteed to kill the insects listed when used as directed. If your money back.
