PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION Harmful if swallowed. Avoid contact with eyes, nose, clothing. Do not allow spray to contact food, feed, or food or feed supplies. Thoroughly wash food or feed surfaces with soap and water if they become contaminated by application of this product. Do not allow children to contact treated surfaces. Do not spray on or near live poultry and live fish. Do not spray on fish tanks before spraying. Do not apply this product in condenser motor housings, furnaces and switch boxes or other electrical equipment. Do not use in areas of food processing plants, restaurants or other areas where food is commercially produced or prepared. Do not use in nursing areas where food is exposed. **NOTE TO PHYSICIAN:** Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatic Atropine only by nebulization and/or orally.

STATEMENT OF PRACTICAL TREATMENT: If it is even or on skin flush with plenty of water. If ingestion persists get medical attention. If swallowed, drink 1 to 2 glasses of water and induce vomiting by forcing back of throat with finger.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning, rinsing or filling of product containers. Do not use in or near water.

PHYSICAL OR CHEMICAL HAZARDS: Do not use or store near heat or open flame.

DIRECTIONS FOR USE: This is a statement of Federal law to use this product in a manner consistent with its labeling.

STORAGE AND DISPOSAL

Storage: Store in a cool dry area away from heat or open flame. **General:** Do not reuse empty container. Wrap container and put in trash container.

Hot Shot Complete Treatment Bug Killer gives rapid kill of crawling insects and leaves an invisible film that keeps killing for weeks.

This product is designed for spot treatment in homes, apartments, non food areas of commercial and institutional offices and buildings, food processing establishments, schools, day care centers, markets, restaurants, auto body, dog kennels and kennels, and dog kennels. Do not use in a space where children will be exposed to the bug.

Hot Shot Complete Treatment Bug Killer gives rapid kill of crawling insects and leaves an invisible film that keeps killing for weeks.

Turn sprayer up to adjust spray.

1. Submerge sprayer and hose in warm tap water for about 5 minutes to straighten hose.
 2. Remove sprayer from water.
 3. Remove nozzle, unscrew cap and turn the screw cap.
 4. Turn sprayer away from face and open top by turning a direction handle.
 5. Hold sprayer below the level of the container and pump several times to prime.
 6. Sprayer may be adjusted from a fine spray mist to a direct stream by turning sprayer top. Hold sprayer 8 to 12 inches from treated surface.
 7. After each use remove sprayer hose and replace nozzle cap to prevent spillage or evaporation.
 8. Spray clear water through hose after each use to clear.
- Sprayer should be used only with Hot Shot Complete Treatment Bug Killer.

TO KILL ROACHES, ANTS, CRICKETS, SILVERFISH, SPIDERS, FLEAS, TICKS, CLOVER MITES, CENTIPEDES, MILLIPEDES, EAR WIGGS, SAWFLIES. Apply as a coarse spray or baseboard directly in cracks, openings, and under doors and windows, under up blinds, and in other dark moist areas. Spray bugs directly when possible. Spray door frames and window sills where bugs may enter. For ants, also spray nests and trails. Repeat as necessary.

TO KILL CARPET BEETLES: Thoroughly spray along baseboard, under doors, and in other dark moist areas. Spray directly on beetles when possible.

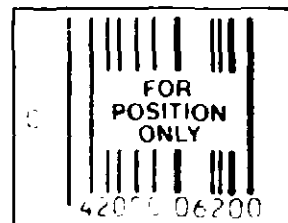

TO KILL FLEAS AND BROWN DOG TICKS: Thoroughly spray all areas for spot treatment by infested areas such as pet beds and bedding, quarters, kennels, and crates, along and behind baseboards, window and door frames and exposed areas of floors and floors covering where there is contact between infested dog or pet and bedding. Where there is contact between infested dog or pet and bedding, the bedding should be removed and replaced with clean fresh bedding after treatment. To control the source of the flea infestation, pet infested bedding should be treated with a product registered for application to animals.

TO KILL FLIES: Use indoors, outdoors, in any area where there are insects. Apply to outside surfaces of buildings, in kennels, quarters, garages, sheds or other areas where there is contact between flies and humans coming to the treated surface. Do not be used on hot surfaces and do not spray on the ground.

Money Back Guarantee: Guaranteed to kill the insects listed when used as directed on your money back.
