NOTICE OF PESTICIDE: REGISTRATION
 REREГИSTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

1. 100% BACULUS THURINGIENSIS
2. 25% BACULUS THURINGIENSIS

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Conwood Corporation
Household Products Division
P.O. Box 217
Nashville, TN 38101

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA Sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA Sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. The ingredient statement and Statement of Practical Treatment.
 - b. Add the phrase "EPA Registration No. 5745-33."
 - c. The submitted efficacy data will support a 6-week claim for killing preadult fleas. However, the submitted data will not support a 6-week claim for kill of adult fleas. The data show that the product will kill adult fleas for a week and that repeat treatment for adults may be necessary before 6 weeks. A statement based on the above data will accompany your label.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

DATE

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Do not use empty container. Wrap container and put in trash collection.

Hot Shot Flea & Tick Exterminator kills fleas on contact, and keeps killing for 6 weeks. Kills adult and preadult fleas.

TO KILL FLEA AND BROWN DOG TICKS IN CARPETING, RUGS, UPHOLSTERED FURNITURE AND PET RESTING AREAS: Begin treatment at furthest point from doorway to the room. Direct spray downward toward rugs and carpeting. Thoroughly apply in a slow, sweeping motion, holding can 18"-24 inches from treated surface and working toward doorway. Spray surfaces at a rate of 90 seconds for every 100 square feet. Spray exterior and underneath upholstered furniture. Also spray underneath removable cushions, in closets and wherever else these insects are seen or suspected. Avoid excessive wetting of surfaces. Leave treated area and do not return for one hour. Do not allow children or pets to walk on treated surfaces until they are completely dry. Ventilate room thoroughly before reentry. For maximum results put off cleaning carpets, floors and furniture with detergents or cleansers for one week. Vacuuming, however, will not affect treated surfaces. Hot Shot Flea & Tick Exterminator leaves a non-staining residue which keeps killing for 6 weeks.

TO KILL FLEA AND TICKS AROUND PET AREAS: Remove and destroy pets' old bedding. Spray sleeping areas of pets, around baseboards, wall cracks and local areas of floors. DO NOT SPRAY ANIMALS. Put fresh bedding in pets' quarters after spray has dried. Treat dogs and cats with a registered flea and tick pet product before allowing them to enter treated area.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid contact with eyes, skin or clothing. Avoid breathing mist. Wash thoroughly after handling and before eating or smoking. Do not use in food areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. In the home, all food processing surfaces, exposed food and utensils should be covered during treatment or thoroughly washed before use. Remove pets, birds, and cover fish aquariums before spraying. Do not allow children or pets to contact treated surfaces until dry.
