

DIRECTIONS: For the prevention of anthracnose and for trees already attacked by fungus mix 4 teaspoonsful to 1 quart of water or 6 tablespoonsful to 1 gallon. Spray KOP-R-KOTE from time blooms form every 7 to 10 days until fruit sets. Spray upper and lower surfaces of foliage. For control of fungus when a copper fungicide is required spray every 8 to 10 days. For best results use fresh mix and a clean sprayer. Spray after a rain to protect film which may have been washed away. Spray in morning hours for best results. For Greenhouse use and tender foliage use at lower strength.

Will not disfigure nor discolor foliage. Effective in controlling mildew and black spot on Roses, rust on Snapdragons, Hollyhocks, Sweet Peas, mildew and leaf spots on Delphiniums, tomato blight and anthracnose on Chrysanthemums.

Do not contaminate ornamental fish ponds.

CAUTION:

Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing spray mists. In case of skin contact wash with soap and water. Avoid contamination of feed and foodstuffs. Keep out of children's reach. Keep children and domestic pets away from treated areas until completely dry.
