BROMO-O-GAS®

FOR CONTROL OF NEMATODES AND WEED SEEDS

ACTIVE INGREDIENTS: 100%
METHYL BROMIDE 98%
CHLOROPICRIN 2%

DANGER

Keep Out of Reach of Children

DO NOT INHALE VAPORS

See other warnings on back panel.

ANTIDOTE: Move victim to fresh air immediately. Keep victim lying down and warm. Give artificial respiration if breathing has stopped. CALL A PHYSICIAN IMMEDIATELY!

GREAT LAKES CHEMICAL CORPORATION, WEST LAFAYETTE, INDIANA

MADE IN U.S.A. EPA Reg. No. 5785-4 EPA Est. No. 5785-AR-01 NET WEIGHT 1 POUND

®Registered Trademark of Great Lakes Chemical Corporation

POISON

WARNING: POISONOUS LIQUID and VAPOR! Contact with liquid may cause severe burns. Do not breathe vapor. Do not get in eyes, on skin or on clothing. In case of contact, immediately remove all contaminated clothing including shoes. Wash skin thoroughly with soap and water and flush eyes with water for at least 15 minutes. Get medical attention. Do not reuse shoes or clothing until free of contamination.

WARNING: When using Brom-O-Gas in areas use the BLACK CANISTER (large) type chin approved organic vapors) with an approved full faced gas mask when using outdoors place special openings on upwind side of cover.

DIRECTIONS: The following are general instructions for the use of Brom-O-Gas in the fumigation of seed beds or transplant beds only. *

SOIL FUMIGANT USES: Brom-O-Gas is a [illegible] warning agent and can be used as a fumigant for the control of nematodes, weed seeds and certain soil-borne fungi in the soil prior to planting seed beds and transplant beds. Brom-O-Gas is highly effective for the control of VEGETABLE SEEDLING DISEASES of [illegible] seed beds. Brom-O-Gas is also effective as an aid in the control of WEEDS GRASSES BARNYARD GRASS and CARPETGRASS [illegible]

SOIL PREPARATION and use of EQUIPMENT: Plow or [illegible] work [illegible] Apply Brom-O-Gas through [illegible] in Applicator Package tube. Burn with torch, [illegible] with heavy soil. Support poly ethylene [illegible] with bricks, soil filled bottles or straw filled sacks. Allow edges of cover to [illegible] shallow trench.

CAUTION: Do not fumigate when soil temperature is below 50°F. Expose for 48 hours when soil temperature is between 50°F and 60°F and for 24 hours when above 60°F. Soil should be moist and friable for best results. Do not fumigate when soil is dry or excessively wet.

DOSAGE: For most purposes use 1 lb. of Brom-O-Gas for each 100 sq. ft. of soil to be treated.

WHEN TO PLANT: Aerate soil for 2 days before seeding or 5 to 7 days before setting out vegetable plants.

APPLICATION of BROM-O-GAS: The cold method consists of conveying the liquid fumigant through a plastic tube from the can to the evaporating pan under the cover. The resulting gas spreads over and penetrates the soil. Do not discharge the liquid directly on the soil.

To obtain hot gas from cans preheat in a bucket of hot water. Before puncturing can be sure outlet tube is on top so that only gas and not liquid fumigant is removed. This causes production of gas more rapidly with greater efficiency. Increase discharge rate by immersing can in hot water.

The fumigant is released from cylinders in conjunction with metering [illegible] apparatus. For details & description of [illegible] which are required on a [illegible] or from Great Lakes [illegible].

CAUTION: STORE IN A COOL WELL VENTILATED PLACE.

TO OPEN: [illegible] are provided to prevent [illegible] Open only with [illegible]

NOTE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. But neither this warranty nor any other warranty of merchantability or fitness for a particular purpose express or implied extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
