

TERR-O-CIDE 93.5

SOIL FUMIGANT

For preplant soil fumigation to control insects, nematodes, weeds and fungi

Active Ingredients 100%

Chloropicrin	93.5
Ethylene dibromide	6.5
Total	100.0

DANGER

KEEP OUT OF REACH OF CHILDREN
POISON

POISONOUS IF INHALED, SWALLOWED
OR CONTACTED WITH SKIN

NET CONTENT

EPA Reg. No. 5785

NOTE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

GENERAL INFORMATION

Terr-O-Cide 93.5 is a fumigant used for preplant soil treatment. It is applied to ground soil to be planted to vegetables, sweet potatoes, ornamentals, equipment, and other plants. It may also be applied to strawberries and outside beds to be planted to asparagus, onions, corn, potatoes, cucumbers, lettuce, watermelons, cantaloupes, and other melons, of all varieties. When the soil is treated with Terr-O-Cide 93.5, it penetrates the soil surface, it vaporizes and diffuses through the soil controlling insects, nematodes, fungi causing damping off, root rot, wilt, and such as bacterial, soil-borne nematodes, weeds and weed seeds. (Especially recommended when completely root-killing root galls are present.)

DIRECTIONS FOR USE

All types of equipment, from hand injectors to tractor drawn machines, are used for the application of Terr-O-Cide 93.5, depending upon the size of the area treated. Effectiveness of treatment increases with air temperature. Treat at temperatures above 60°F. For best kill of weed seeds, the soil must be moist for at least four days prior to fumigation.

DOSAGE—Normal dosage is 2.3 gallons per acre on 10" centers in light soil, 8.9 centers for heavier soils. When using the 1/2" type applicator inject 6-10 pint per 100 linear feet at 12" spacing. Inject 4 to 6" deep or at half bench depth. Use deeper injections in light soils or at higher temperatures. Consult your State Extension Service for local conditions.

For bulk soil treatment use 1.2-3.4 lb. per cubic yard, depending on soil texture.

GAS RETENTION—For small areas take over top of soil, immediately apply water seal. For best results use a polyethylene tarp cover. For large areas soil plowed soil immediately by seeding and pulling a mulch or cover with the surface roller. Half acre inch of water added by irrigation or rain will improve soil water seal. Laying of polyethylene tarp is used at the edge of treated area for insect control.

EXPOSURE PERIOD—Expose 14-49 days depending on soil texture and soil moisture.

AERATION—Do not plant until soil is aerated after exposure. Aeration may be done 14 days. Higher moisture, lower temperatures, and higher soil moisture require a longer time longer.

PRECAUTIONS

Terr-O-Cide 93.5 is a toxic fumigant. Avoid contact with eyes, nose, mouth, and skin. Avoid contact with clothing. Do not use in enclosed spaces. Do not use in buildings, basements, and other structures. Do not use in areas where people, animals, or birds are present. Do not use in areas where food is stored. Do not use in areas where children are present. Do not use in areas where pets are present. Do not use in areas where livestock are present. Do not use in areas where wild birds are present. Do not use in areas where wild animals are present. Do not use in areas where people are present. Do not use in areas where children are present. Do not use in areas where pets are present. Do not use in areas where livestock are present. Do not use in areas where wild birds are present. Do not use in areas where wild animals are present.

DIRECTIONS FOR EMPTYING CYLINDER

Empty the cylinder by discharging the gas into a safe place. Do not discharge into a confined space. Do not discharge into a fire. Do not discharge into a water source. Do not discharge into a sewer. Do not discharge into a drainage ditch. Do not discharge into a stream. Do not discharge into a lake. Do not discharge into a pond. Do not discharge into a reservoir. Do not discharge into a bay. Do not discharge into an ocean. Do not discharge into a river. Do not discharge into a canal. Do not discharge into a ditch. Do not discharge into a trench. Do not discharge into a well. Do not discharge into a cistern. Do not discharge into a tank. Do not discharge into a container. Do not discharge into a receptacle. Do not discharge into a vessel. Do not discharge into a bin. Do not discharge into a box. Do not discharge into a crate. Do not discharge into a barrel. Do not discharge into a drum. Do not discharge into a can. Do not discharge into a jar. Do not discharge into a bottle. Do not discharge into a jug. Do not discharge into a bucket. Do not discharge into a pail. Do not discharge into a tub. Do not discharge into a sink. Do not discharge into a toilet. Do not discharge into a bathtub. Do not discharge into a shower. Do not discharge into a kitchen. Do not discharge into a bathroom. Do not discharge into a bedroom. Do not discharge into a living room. Do not discharge into a dining room. Do not discharge into a family room. Do not discharge into a recreation room. Do not discharge into a porch. Do not discharge into a patio. Do not discharge into a deck. Do not discharge into a balcony. Do not discharge into a terrace. Do not discharge into a walkway. Do not discharge into a driveway. Do not discharge into a parking lot. Do not discharge into a street. Do not discharge into a highway. Do not discharge into a road. Do not discharge into a bridge. Do not discharge into a tunnel. Do not discharge into a culvert. Do not discharge into a pipe. Do not discharge into a sewer. Do not discharge into a drain. Do not discharge into a vent. Do not discharge into a chimney. Do not discharge into a stove. Do not discharge into a furnace. Do not discharge into a boiler. Do not discharge into a radiator. Do not discharge into a heater. Do not discharge into a cooler. Do not discharge into a freezer. Do not discharge into a refrigerator. Do not discharge into a microwave. Do not discharge into a toaster. Do not discharge into a coffee maker. Do not discharge into a blender. Do not discharge into a juicer. Do not discharge into a food processor. Do not discharge into a mixer. Do not discharge into a power drill. Do not discharge into a power saw. Do not discharge into a power sander. Do not discharge into a power sander. Do not discharge into a power sander. Do not discharge into a power sander.

STORAGE AND RETURN OF CYLINDER
