

GENERAL DIRECTIONS FOR USE

When bee combs and/or hives are stored for the winter, infestations of the bee moth or wax worm can be controlled through a simple procedure of fumigation with E-D-BEE. Fumigation can be done at any time during storage, but when done in the fall and weather remains warm several weeks thereafter, a second treatment may be necessary.

The hives . . . combs should be fumigated with E-D-Bee at 1 pound per 1,000 cubic feet (place container on scale; for every 1,000 cubic feet fumigated, weight of the container should be reduced by 1 pound) of space in a gas-tight room or under gas-tight covers, such as polyethylene sheeting or plastic-coated tarpaulin, for a period of at least 20 hours. The room in which the fumigation is done should be in a separate building, which should not be entered by anyone during the fumigation or until completely aired following fumigation. If well constructed, it can be made gas-tight by sealing all doors, windows, vents, etc. with sealing tape of kraft paper applied with paste or grease.

An alternate method is to stack the supers in a room and cover them with a gas-tight cover.

E-D-BEE

A fumigant for use in the control of bee moths or wax worms in bee combs and hives.

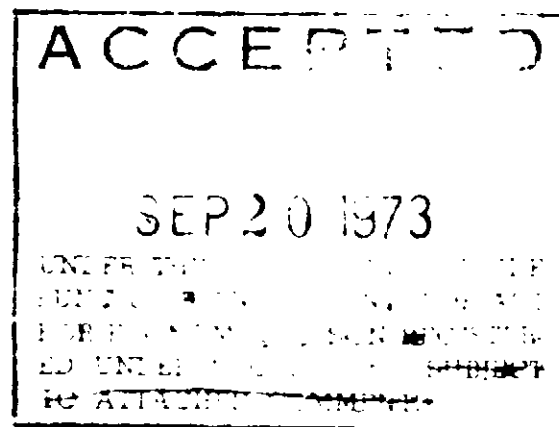

ACTIVE INGREDIENT:

Ethylene dibromide 84.5%

INERT INGREDIENT 15.5%

Total 100.0%

One gallon of E-D-BEE weighs 14 lbs.

PRECAUTIONS

Store in tightly closed containers in a cool place away from dwellings.

FIRST AID: In case of contact, immediately remove contaminated shoes and clothes and wash skin with soap and water. Flush eyes copiously with water for at least 15 minutes and get medical attention. Do not reuse clothing or shoes until completely free of chemical odor. If inhaled, remove patient to fresh air. If swallowed, induce vomiting with 2 parts of water to 1 part of salt solution of warm water. Call a doctor.

Causes skin irritation and blisters on contact. Absorbed through skin.

Avoid breathing vapor. Do not get in eyes, on skin or on clothing.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of
