

AGRIBROM™ TABLETS

For Control of Microbial Slimes and Fouling in Recirculating Cooling Water, Irrigation, and Automatic Water Distribution Systems in Greenhouses and Agricultural Premises.

ACTIVE INGREDIENT

1-Bromo-3-chloro-5,5-dimethyl-2,4-imidazolidinedione	92.5%
Inert Ingredient.....	7.5%
Total	100%

**KEEP OUT OF REACH OF CHILDREN
D A N G E R**

Statement of Practical Treatment

- IF SWALLOWED:** Feed bread soaked in milk, followed by olive oil or cooking oil. Seek medical attention immediately.
- SKIN CONTACT:** Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation develops, seek medical attention.
- EYE CONTACT:** Flush eyes with cold water for at least 15 minutes. Seek medical attention promptly.

WEST LAFAYETTE, INDIANA 47906**

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER**

CORROSIVE. Causes eye and skin damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public water unless in accordance with an NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean, dry utensils and equipment. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, hazardous gases and possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. If necessary, flood with large volumes of water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

STORAGE: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat, open flames, organic chemicals and sunlight. Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **DO NOT REUSE EMPTY CONTAINER.** Triple rinse the container (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate. Burn only if allowed by state or local authorities. If burned, stay out of smoke.

CHEMIGATION: Refer to supplemental labeling entitled GLK-260A for use directions for chemigation, posting requirements of chemigation areas, product use when connected to public water system, and use in automatic water distribution systems including: drip (trickle) irrigation systems, mist, fog, capillary mat, spaghetti tubes, ebb-and-flow, hydroponics. Do not apply this product through any irrigation system unless the supplemental labeling on chemigation is followed.

RECIRCULATING COOLING WATER SYSTEMS. For control of microbial slimes and fouling in recirculating evaporative cooling systems in greenhouses and agricultural premises. For best results, evaporative cooling equipment should be clean and free from algae and microbial slime at the beginning of treatment. Equipment should be adjusted for even distribution of treated water over the surface of the evaporative cooling pad.

DOSAGE RATES. Initial Dose. When the system is noticeably fouled, use 1 to 2 tablets for each 100 gallons of water contained in the system. Add additional Agribrom Tablets until a residual of 8 to 10 ppm bromine is established. **Maintain treatment** until system is free from microbial fouling. **Maintenance Dose.** Use Agribrom Tablets as needed to maintain a residual of 5-10 ppm bromine.

IRRIGATION AND AUTOMATIC WATER DISTRIBUTION SYSTEMS (INCLUDING MIST, FOG, AND SUB-IRRIGATION SYSTEMS: NON-FOOD CONTACT ONLY). For prevention of growth of algae and build-up of microbial slimes and fouling.

DOSAGE RATES. For best results, irrigation equipment should be clean and free from microbial fouling at the beginning of treatment. Use Agribrom Tablets to maintain a residual of 5 to 10 ppm bromine in the treated water. To insure even distribution of Agribrom Tablets, it is important to level treated mats. If microbial growth develops, add additional Agribrom Tablets until bromine residual reaches 10 to 15 ppm. Continue treatment until fouling is eliminated, then resume treatment between 5 and 10 ppm bromine.

MEASUREMENT OF BROMINE RESIDUALS. Treatment levels of Agribrom Tablets can best be measured with an Agribrom test kit. Bromine residuals should be measured in water taken from the treated system while it is running. Tests should be made immediately after drawing water samples from the system.

PRECAUTIONS. Do not mix Agribrom Tablets with pesticide or fertilizer concentrates. Do not apply Agribrom during application of pesticides through irrigation systems.

Application of Agribrom Tablets above labelled rates may result in phytotoxicity. If symptoms of phytotoxicity develop, check bromine residual and lower or discontinue treatment.

4274

An Agribrom Tablet weighs 20 grams.

AVAILABLE BROMINE: 61%
AVAILABLE CHLORINE: 27%
