RATE INSECTICIDES PER  
100 GALLONS WATER

RATE APPLICATION

1 Gallon

Apply in trench 30 inches deep, but not below the top of footing, if this is shallower. Trench must extend all the way around the building being treated. Use one gallon of the mixture per lineal foot of trench including backfill soil. Use 2 gallons per 5 lineal feet for trenches less than 15 inches deep. Also soak under and around porches and around each of the piers under the house.

Use of this material in a manner not at a time other than as directed may result in the directions may produce undesirable results.

Reuse equipment and containers and material wastes by rinsing in non-crop lands away from water supplies. Containers should be disposed by puncturing holes in them and burying with waste.
