UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC PESTICIDE REGISTERED
ED UNDER NO. 281-2 SUBJECT
TO ATTACHED COMMENTS.

X-termito.

DIRECTIONS FOR TERMITE CONTROL

Mix 1 quart of X-TERMITE with 12 gallons of water.

Apply 1 gallon per 10 square feet of soil surface, under slab, attached porches, entrance platforms, utility entrances and similar situations, using a watering can, spray or other convenient applicator.

Trench along the foundation completely around the building at least 6 inches wide and at least 30 inches deep for building with deep foundations, such as those with basements, but do not dig deeper than the top of the footing in any case.

Apply 1 gallon per lineal foot to shallow trenches sloping toward the foundation, and 2 gallons per lineal foot to deep trenches (15 inches or more).

When treating timber, it is best to have timbers on concrete.

When this is not possible the soil where the wood contacts the ground should be thoroughly saturated with X-TERMITE solution.

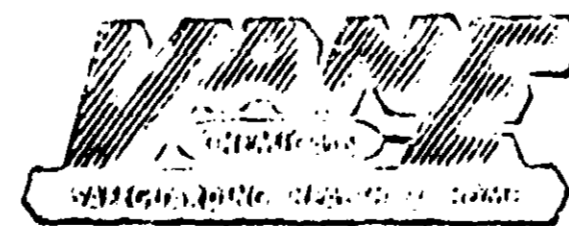

Spray or pour X-TERMITE solution around the foundation, making sure to saturate all timbers resting on soil or concrete block or other supports. Use liberally and do not skip any footage around the entire home inside and outside.

* X-TERMITE will give five years of guaranteed protection against termites if applied as directed.

X-TERMITE never spots or stains, even when used on floors, woodwork or finest carpeting.

X-TERMITE will not harm your grass, trees or shrubs.

USDA Reg. No. NUMBER 5801

P.O. BOX 61 ALTON, ILLINOIS

1 Gallon, U.S. Measure

Exten

X-TERMITE solution

X-TERMITE solution is intended in household applications only for use against roaches, waterbugs, silverfish, ants, carpet beetles in premises and not for any other purpose.

HOUSEHOLD INSECTS

Mix one part of X-TERMITE with 23 parts of water.

Spray, brush or sponge X-TERMITE in corners, cracks, crevices or baseboards, or wherever any of the above insects run, rest or hide.

Also spray X-TERMITE solution around door frames and window sills for ant control.

X-TERMITE solution, when used in the home should be restricted to spot treatment only. Any use of X-TERMITE solution should be with a coarse wet spray as a spot treatment only, not as a space spray.

LAWN INSECTS

For the control of ants, spiders, chiggers, lawn moths, crickets, ticks, grubs, worms, sod webworms, mosquitoes and Japanese Beetle larvae mix one part of X-TERMITE with 49 parts of water.

FOR LAWNS: Spray or sprinkle 5 gallons of X-TERMITE solution over approximately 2,000 sq. ft. two or three times a year.

Do not allow children or pets on treated lawn until X-TERMITE solution has been washed in and the lawn is dry.

CAUTION

X-TERMITE SOLUTION

Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid contact with skin. In case of contact with skin, wash promptly with soap and water. Avoid contamination of food and feedstuffs.

ANTIDOTE:

EXTERNAL:

In case of spillage on skin, wash promptly with soap and water.

INTERNAL:

Emetic of 1 tablespoonful mustard in tumbler of water. Call a physician.

FIRE HAZARD

Do not store near open flame. Do not spray petroleum solutions into or near open flame. Do not smoke while spraying.

This product is toxic and will kill fish and wildlife.

Birds feeding on treated areas may be killed.
