

[5802-47]

CAUTION

Cover or remove all food or feedstuffs prior to application to prevent contamination

Apply this product only as specified on this label

WARNING

Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130 F may cause bursting. Never throw container into fire or incinerator.

TO OPERATE AEROSOL:

Remove protective cap -- Holding dispenser upright, point nozzle in desired direction and press dispensing button to spray.

Replace protective cap to prevent accidental discharge when not in use.

ACTIVE INGREDIENTS

Pyrethrins	60
*Piperonyl butoxide tech	1.40
Petroleum distillate	13.00
INERT INGREDIENTS	85.00

100.00

*Equivalent to 1.12% butylarbityl-16-propylpiperonyl ether and 28% related compounds

ABR#2 Aircraft Insecticide Aerosol

*Kills Flies, Mosquitoes
and Gnats*

CAUTION
KEEP OUT OF REACH OF CHILDREN

See side panel for additional cautions.

Net Weight: 12 Ounces

Manufactured by
ABR CHEMICAL COMPANY
Atlanta, Georgia

DIRECTIONS FOR USE

(1) The insecticide shall be dispensed in the amount of not less than 5 grams for each 1,000 cubic feet of enclosed space in the aircraft, and shall be released or sprayed throughout all accessible compartments. When valve is fully depressed, material is dispensed at approximately 1 gram per second.

(2) Disinsecting may be accomplished either while the aircraft is on the ground before take-off from the last airport before arrival in the United States, or after departure from such airport (for compartments accessible in flight). In no case shall disinsecting be accomplished later than 30 minutes before the first landing at a United States port.

(3) The ventilation system shall be stopped and all openings to the exterior kept closed while the insecticide is being released or sprayed, and for a period of not less than three minutes thereafter. If disinsectization is accomplished on the ground prior to take-off the ventilation system may be opened at the end of such period, provided that the system is equipped with filters or other means for preventing the entrance of insects into the aircraft, but doors, windows, or other openings to the exterior, shall be kept closed until after the take-off, except in the case of emergency or to permit persons applying the insecticide to debark.

USE NO GREATER DOSAGES THAN REQUIRED.
EXCESSIVE SPRAYING IS WASTEFUL.
