JAN - 8 2001

Subject: Spruce Ups  
EPA Registration No. 5813-58  
Amendment Dated July 10, 2000

Attn: Stephen Smith  
Registration Specialist

The amendment referred to above, submitted in connection with registration under the federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable with the following comments:

1. Sanitizing claims must state for hard non-porous glass surfaces. Data was not submitted to support claims for other hard non-porous surfaces.
2. Change statement "can help reduce the risk of cross-contamination during flu season and travel" to read "can help reduce the risk of cross-contamination on treated surfaces during flu season and travel."
3. Under "DEODORIZATION", delete terms such as lamps, light switch panels, and cabinet handles".
4. Change the statement "quickly disinfects" to read "disinfects in 4 minutes".
5. Delete all claims pertaining to bacteria that can live and grow in the refrigerator. Data was not submitted to support these claims. This product can not be used for the inside of appliances. It can only be used to disinfectant the outside of appliances.
6. Clarify which surface areas around the toilet. The term toilet areas is too broad. Also, specify not to be used inside the toilet bowl.
7. For kitchens, specify for use on non-food contact surfaces.
