Contains 40% of Technical Pentachlorophenol as defined in Federal Specification TT-W-570.

Warning: Flammable

See side panel for additional cautions.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: ONE GALLON

DIRECTIONS FOR USE

An excellent wood preservative in concentrated form for protection against termites, wood rotting fungi and decay. To make a ready-to-use solution, mix one part of this concentrate with ten parts by volume of a suitable petroleum solvent such as mineral spirits, kerosene, or light furnace oil. Not intended for use under paint.

Wood should be dry and free from bark. Apply two or more flowing coats to wood that is to come in contact with the ground, or soak wood for a minimum of three minutes. Fence posts should be soaked for 12 to 48 hours to permit deep penetration of the preservative. For best penetration, use at temperatures above 70° F.

Wear protective clothing and rubber gloves when handling the freshly treated lumber.

This product is toxic to fish and/or wildlife. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.
