CAUTION

HUMANS — Wash hands after use. Harmful if swallowed. Keep out of reach of children. Do not use or store near heat or open flame.

PLANTS — Avoid spraying BLACK LEAF DORMANT SPRAY on foliage during high temperatures or when there has been a lack of rain. Do not apply to broad-leaved evergreens during freezing or near freezing temperatures. Not to be used on Maidenhair Ferns, Cocos Palms, or Maples.

NET CONTENTS: 4 FL. OZ.

**dormant
 Spray**

for year
 round use

GENERAL DIRECTIONS

PLEASE READ OUR LABEL CAREFULLY BEING SURE TO NOTE ALL INSTRUCTIONS, WARNINGS, AND CAUTIONS.

Shake well before using. Thoroughly wet all plant pests, as well as* all portions of the plants being sprayed.

DORMANT SPRAY: BLACK LEAF DORMANT SPRAY will control Red Spiders, Mites, Scale Insects, Mealybugs on Dormant Shrubs, Evergreens, Fruit Trees, and Shade Trees, as well as other woody plants, especially during the dormant season. Mix 5 ozs. of BLACK LEAF DORMANT SPRAY in one gallon of water when preparing for spraying.

SPREADER OR STICKER: BLACK LEAF DORMANT SPRAY can be combined with other Black Leaf Products Sprays, such as BLACK LEAF 40, BLACK LEAF 50% MALATHION SPRAY, BLACK LEAF SHEEN (a fungicide) and will increase the efficiency of the spraying since it will cause the insecticides or fungicides to adhere to the insects or plant surfaces which are being treated. When using as a Spreader-Sticker, the insecticides or fungicides may be used at the regular strength. Add four teaspoonful of BLACK LEAF DORMANT SPRAY to each gallon of spray being mixed.

SPRAY FOR GROWING SEASON: Scale Insects, Red Spiders, Mites, Mealybugs, White Fly Larvae on Citrus, Fruit, Shade Trees, Evergreens, Camellias, Azaleas, Hardy Shrubs, can be controlled by using five tablespoonful BLACK LEAF DORMANT SPRAY to each gallon of water. This application may be used with safety during the growing season.

WINTER SEASON: Mix five ounces of BLACK LEAF DORMANT SPRAY with one gallon of water for control of Scale Insects and insect eggs that were left on the plants. This will help to control many scale insects. BLACK LEAF DORMANT SPRAY will be effective in destroying larvae of Red Spiders and Moths.

HOUSE PLANT LEAF SHINE: BLACK LEAF DORMANT SPRAY can be used to brighten the leaves of hardy house plants, by using with a mixture of three tablespoonful of Black Leaf Dormant Spray per gallon of water. (Do not use on African Violets.)

IN THE GREEN HOUSE: Use two tablespoonful of BLACK LEAF DORMANT SPRAY per gallon of water to control Scale Insects, Red Spider, Mealybugs on Hardy Shrubs, and White Flies. Allow 60 days between sprays.

NOTICE: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
