**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
CAUTION**

Harmful if swallowed. If swallowed, do not induce vomiting. Avoid breathing of vapors and spray mists. Wash after handling.

ENVIRONMENTAL HAZARDS

Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Please read entire label carefully, be sure to follow all instructions and cautions. Shake well before using. Thoroughly wet all plant pests, as well as all portions of plants being sprayed. Shake diluted spray frequently during application. **DORMANT SPRAY:** BLACK LEAF DORMANT SPRAY will control red spiders, mites, scale insects, mealybugs on dormant shrubs, evergreens, fruit trees, and shade trees, as well as other woody plants, especially during the dormant season. Mix 5 ozs. of BLACK LEAF DORMANT SPRAY in one gallon of water when preparing for spraying. **SPREADER-STICKER:** BLACK LEAF DORMANT SPRAY can be combined with other BLACK LEAF PRODUCTS SPRAYS, such as BLACK LEAF 40, BLACK LEAF 50%, MALATHION SPRAY, and will increase the efficiency of the spraying since it will cause the insecticides or fungicides to adhere to the insects or plant surfaces which are being treated. When using as a spreader-sticker, the insecticides or fungicides may be used at the regular strength. Add four teaspoonful of BLACK LEAF DORMANT SPRAY to each gallon of spray being mixed. Observe all cautions and limitations on labeling of all products used in mixtures.

SPRAY FOR GROWING SEASON: Scale insects, red spiders, mite, mealybugs, white fly larvae on citrus, fruit, shade trees, evergreens, camelias, azaleas, hardy shrubs, can be controlled by using five tablespoonful of BLACK LEAF DORMANT SPRAY to each gallon of water. This application may be used safely during the growing season.

WINTER SEASON: Mix five ounces of BLACK LEAF DORMANT SPRAY with one gallon of water for control of scale insects and insect eggs that were left on the plants. This will help to control many scale insects. BLACK LEAF DORMANT SPRAY will be effective in destroying larvae of red spider and moths.

NOTE ON CITRUS: Do not apply when trees are in or near winter. Oil applied during August and September may affect suds content, retard color. Oil applied after October 1 may increase cold damage to trees. Do not use dormant sprays in combination with or immediately preceding or following applications of Dinitro compounds, sulfur, Captain, Folpet, Dyrene, Karathane, Moreslan, or Sevin. You must determine final to fit local growth and climatic conditions.

HOUSE PLANT LEAF SHINE: BLACK LEAF DORMANT SPRAY can be used to brighten the leaves of hardy house plants by using a mixture of three tablespoonful of BLACK LEAF DORMANT SPRAY per gallon of water. (Do not use on African Violets.)

IN THE GREEN HOUSE: Use two tablespoonful of BLACK LEAF DORMANT SPRAY per gallon of water to control scale insects, red spiders, mealybugs on hardy shrubs, and white flies. Allow 60 days between sprays.

STORAGE AND DISPOSAL

Keep container tightly closed in storage to prevent entry of water. Do not reuse empty container. Wrap container and put in trash collect in.

NOTICE: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given here with.
