PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful is swallowed. Avoid breathing of vapors and spray mists. Wash after handling.

STATEMENTS OF PRACTICAL TREATMENT

IF SWALLOWED: Do NOT induce vomiting. Give demulcents. If a large quantity has been ingested, have physician induce emesis.

IF IN EYES: Flush with water for 15 minutes.

IF ON SKIN: Wash with soap and water

ENVIRONMENTAL HAZARDS

Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a ''' manner inconsistent with its labeling.

Please read entire label carefully, being sure to follow all instructions and cautions. SHAKE WELL BEFORE USING. Thoroughly wet all plant pests as well as all portions, of plants being sprayed. Shake diluted spray frequently curing application.

. . . .

BLACK LEAF DORMANT SPRAY (BLEAF\DORMANT)
Page 1

DORMANT SPRAY: This product will control Mealybugs, Mites, Red Spiders, and Scale insects on dormant evergreens, fruit trees, shade trees, and shrubs, as well as other woody plants, especially during the dormant season. Mix 5 fl oz of this product in 1 gal of water (or use 40mL/L water) when preparing for spraying.

SPREADER-STICKER: This product can be combined with other insecticidal and fungicidal sprays, such as 50% Malathion Spray, and will increase the efficiency of the spraying, since it will cause the insecticides or fungicides to adhere to the insects or plant surfaces which are being treated. When using as a spreader-sticker, the insecticides or fungicides may be used at the regular strength. Add 4 teaspoonfuls (2/3 fl oz) of this product to each gallon of spray being mixed (or use 5 mL/L). Observe all cautions and limitations on labeling of all products being used in mixtures.

SPRAY FOR GROWING SEASON: Mealybugs, Mites, Red Spiders, Scale Insects, and Whitefly larvae on citrus, fruit, and shade trees, and on azaleas, camellias, evergreens, and hardy shrubs, can be controlled by adding 5 tablespoonfuls (2 1/2 fl oz) of this product for each gal of water (or use 20 mL/L). This application may be used with safety during the growing season.

WINTER SEASON: Mix 5 fl oz of this product into each gal of water (or use 40 mL/L) for control of Scale Insects and insect eggs that were left on the plants. This will help to control many Scale Insects. It will be effective in destroying larvae of Red Spiders and Moths.

NOTE: On CITRUS, do not apply when trees are in or near wilting. Oil applied during August and September may affect solids content and retard color. Oil applied after October 1 may increase cold damage to trees.

Do not use dormant sprays in combination with (or immediately preceding or following) applications of Captan, Dinitro or Sulfur compounds. Dyrene (R), Folpet, Karathane (R), Mcrestan (R), or Sevin (R). You must determine final combination to fit local growth and climatic conditions.

the leaves of hardy house plants by using a mixture, of, 3 tablespoonfuls (1 1/2 fl oz) per gal of water (or use

BLACK LEAF DORMANT SPRAY (BLEAF\DORMANT)
Page 2

12mL/L). Do not use on African Violets.
IN THE HOBBY GREENHOUSE: Use 2 tablespoonfuls (1 fl oz) of this product per gal of water (or use 8mL/L) to control Mealybugs, Red Spiders, Scale Insects, and Whiteflies on hardy shrubs. Allow 60 days between sprays.

STORAGE AND DISPOSAL

GENERAL: Do not contaminate water, food, feed, or other pesticides by use, storage, or disposal. If damaged, leaking, or spilled, soak up and wrap waste, then dispose of as below.

STORAGE: Keep in upright, tightly closed original container in a cool, dry, locked area away from flames, sparks, sunlight, other chemicals, and other sources of ignition, heat, degradation, or contamination. Keep container tightly closed to prevent entry of water.

DISPOSAL: Do not reuse empty container. Rinse original container thoroughly, then securely wrap in several layers of newspaper and discard in trash.
