FACTS ABOUT

WARE

BAIT
STATION

THE MODERN RODENTICIDE

WARE is a special mixture of first quality grain and a highly effective insect killing ingredient. Rats and mice eat WARE and die, and it won't harm them.

WARE must be taken daily over a period of several days. Rats and mice do not associate odorless WARE with its cumulative poisoning effect. They return again and again to this fine grain supply until they die.

WARE is guaranteed to kill rats and mice.

DIRECTIONS

FOR RAT CONTROL

- a) Bait station should be the minimum amount used.
- b) Bait should be placed in locations not accessible to children, pets, and domestic animals, or in tamper proof bait boxes.
- c) An uninterrupted supply of bait should be maintained for at least 15 days.

FOR MOUSE CONTROL

- a) Teaspoon amounts (1/2 to 1 ounce) of bait should be placed at 8-12 foot intervals.
- b) Bait should be placed in locations not accessible to children, pets, and domestic animals, or in tamper proof bait boxes.
- c) An uninterrupted supply of bait should be maintained for at least 15 days.

DO NOT RE-USE CONTAINER, DESTROY WHEN EMPTY
