SPOT WEED KILLER

GENERAL DIRECTIONS FOR USE:

Shake thoroughly before using. Lift sprout for a ready to use spray application. Always be ready to squoze the can and weed without shaking or swirling.

SPOT WEED KILLER contains powerful 2,4-D for effective thorough control of a broad range of weeds infesting lawns. May cause injury to Bent grass and Clover.

To kill dandelions, wild onions, pennywort, plantain, and other common weeds, apply a small quantity directly to the weed when the plants are growing vigorously. It is not necessary to drench the weeds; a light application to wet the foliage thoroughly is adequate. Repeat as necessary. Avoid spray drift to desirable plants.

To use, shake can thoroughly. Lift sprout, exposing applicator nozzle. Invert can, then tightly squeeze the sides of the can directing the stream where desired. To stop application, release pressure on the can.

SPOT WEED KILLER is designed specifically for "spot" weeding lawns. To cover large areas heavily infested with weeds, use BROADLEAF WEED KILLER concentrate, diluted in accordance with directions and applied with a sprayer.

CAUTION: AVOID CONTACT WITH SKIN, EYES OR CLOTHING. DO NOT TAKE INTERNALLY.

CAUTION: Do not use SPOT WEED KILLER in flower beds or close to ornamental shrubbery or flowers, as vapors from the product may injure susceptible plants in the immediate vicinity. Do not store near fertilizers, seeds, insecticides or fungicides.

Do not reuse empty container. Wash thoroughly with water and detergent. Discard in a safe place.
