

**DIRECTIONS FOR USE
SHAKE WELL BEFORE USING**

Do not remain in treated areas and ventilate the area after treatment is completed. Remove cap; hold in upright position about 2 feet from object to be sprayed with opening in nozzle pointing in desired direction. Press button to release spray and spray directly on insects where possible.

FLYING HOUSEHOLD INSECTS:

(Flies, gnats, mosquitoes.) Close doors and windows of room and remove pets, birds, and fish. Then proceed to spray all parts of room with sweeping circular motion. (Hit insects directly with spray where possible.) Keep room closed for 15 minutes after spraying.

CRAWLING HOUSEHOLD INSECTS:

(Roaches, ants, bedbugs, silverfish, spiders.) When possible, use spray directly on insects. Or spray insects' hiding places, under sinks, stoves, in crevices, in cracks, around doorsills, pipes, window frames, storage areas, refuse areas, etc. For ants, spray ant-trails. Avoid direct spraying of foods. Spray mattresses and beds for bedbug control.

CLOTHES MOTHS AND CARPET BEETLES:

Woolens must be cleaned thoroughly before using this spray. Spray garments thoroughly from a distance of 2 feet. Do not overlook folds and seams when spraying. Unless garments are stored in a mothproof container, monthly application is suggested. Interior surfaces of storage closets and trunks should be thoroughly sprayed.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° F. may cause bursting. Never throw container into fire or incinerator.

CAUTION: Harmful if swallowed. If used in a food processing or preparation area, foods should be removed or covered during treatment. Food processing surfaces should be covered during treatment or thoroughly cleaned before re-use. Do not treat while food processing is underway.
