ACCEPTED
with COMMENTS
in EPA Letter Dated:

OCT 14 1982

Under the Federal Insecticide,
Fungicide, and Rodenticide Act other
pesticides are recommended for the
control of termites. This product is
registered under EPA Reg. No.
5887-67

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS

WARNING

May be fatal if swallowed. Do not
breath vapor, dust, or spray mist. Do
not get in eyes, on skin or clothing. In
case of skin contact, wash immediately
with soap and water. Avoid contamination
of feed and foodstuffs.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and
other wildlife. Birds feeding on treated
areas may be killed. Keep out of lakes,
streams and ponds. Do not apply where
runoff is likely to occur. Do not apply
when weather favors drift from treated
areas. Do not contaminate water by
cleaning of equipment or disposal of
wastes. Apply this product only as
specified on this label.

PHYSICAL OR CHEMICAL HAZARDS

WARNING

Do not use, pour, spill or store near heat
or open flame.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Drink one or two
glasses of water and induce vomiting
by touching back of throat with finger.
Do not induce vomiting or give anything
by mouth to an unconscious person.
Get medical attention immediately.

IF INHALED: Remove victim to fresh
air and apply respiration if indicated.

IF ON SKIN: Wash promptly with soap
and water. Rinse thoroughly.

IF IN EYES: Rinse eyes for at least 15
minutes with water and call a physician
immediately.

DISPOSAL

Do not reuse empty container. Wrap
container and put in trash collection
This package will make up to 48 gallons
of 1.0% emulsion.

NOTICE: Buyer assumes all risks of
use, storage or handling of this material
not in strict accordance with directions
given herewith.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

WARNING

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use BLACK LEAF 72% CHLORDANE TERMITIC CONTROL in a 1.0% water emulsion. This 1.0% emulsion can be made by adding 1 pint of BLACK LEAF 72% CHLORDANE TERMITIC CONTROL to 12 gallons of water, 1 quart to 24 gallons of water, etc. This proportional emulsion should be applied as follows:

TERMITIC CONTROL IN EXISTING STRUCTURES BUILDINGS HAVING BASEMENTS OR CRAWL SPACES: First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extends from the trench bottom to the top of the footing. Make holes closer in hard-packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion (or solution) in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the backfill. Likewise, treat along the inside of foundations of crawl-space buildings. Cover treated soil with a thin layer of untreated soil.

For raised porches, terraces, and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of emulsion (or solution) into each hole. Refill holes. Slabs with heat ducts or radiating heat pipes should be treated by commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-back-flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-back-flow or anti-siphonage equipment will help to insure that the user of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), state, and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. If this is the situation treat as follows: Do Not Apply Under Pressure. Soil should be removed to an area safe from well or domestic water contamination, treated, allowed to stand undisturbed for two to four hours then returned to the trench which has been lined with 4 mil. plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

Black Leaf Products Company
667 North State Street
P.O. Box 418
Elgin, IL 60120

Attention: Russell Sawyer

Gentlemen:

Subject: Termiticide L.I.P.
Black Leaf 72% Chlordane Termite Control
EPA Registration No. 5887-67
Your Application of March 9, 1982

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

At the next label printing, incorporate the following revisions:

1. In the Precautionary Statements, the subheading should read: Hazards To Humans And Domestic Animals.
2. In the Precautionary Statements, under the subheading Environmental Hazards, delete the following sentences which may appear:
 - o Birds feeding on treated areas may be killed.
 - o Birds and other wildlife in treated areas may be killed.
 - o Do not apply where runoff is likely to occur.
 - o Do not apply when weather favors drift from treated areas.
3. In the Precautionary Statements, under the subheading Physical or Chemical Hazards, delete the signal word WARNING.
4. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT

If swallowed - Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching the back of throat with finger. If possible, vomiting should be induced under medical supervision. DO NOT induce vomiting or give anything by mouth to an unconscious person.

1887-67

-2-

If inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.

If on skin - Remove contaminated clothing and wash affected areas with soap and water.

If in eyes - Flush eyes with plenty of water. Get medical attention immediately.

5. After the Mixture Statement and before the dilution directions, there should be a heading for the specific use directions which should read:

Subterranean Termites - Directions for Homeowner Use

Since this product is subject to the child-resistant (special) packaging regulations, submit a signed certification statement that the packaging complies with these requirements.

Refer to 40 CFR 162.16 "Pesticides Requiring Special Packaging" and the Federal Register Vol. 46, No. 41, Tuesday, March 3, 1981, pp. 15104-15109, "Classification of Policy Issues on Special Packaging," for guidance and proper submission requirements.

Sincerely yours,

George T. LaRocca

Precautionary Statements**Hazards to Humans and Domestic Animals**

Harmful if swallowed. Avoid inhalation of vapors. Avoid contact with skin, eyes, or clothing. Wash contaminated skin promptly with soap and warm water. For eyes, flush with plenty of water. Get medical attention if irritation persists. Avoid contamination of food and foodstuffs. Wash hands with soap and water after using and before eating or smoking. Do not allow children to lie or sleep in treated areas until at least six hours following treatment.

Do not use in commercial food processing preparation, or serving areas or in household storage areas. In home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Cover or remove exposed food.

Remove pets, birds, and cover fish aquariums before spraying.

For birds—Remove animals before applying. Do not treat animals. Do not contaminate milk or milking utensils. Ventilate before allowing animals to reoccupy treated buildings.

Physical or Chemical Hazards

Contains under pressure. Do not use near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

STATEMENT OF PRACTICAL TREATMENT

If inhaled—Remove victim to fresh air. Apply artificial respiration if indicated.
If on skin—Remove contaminated clothing and wash affected areas with soap and water.
If in eyes—Flush eyes with plenty of water. Get medical attention if irritation persists.

**BETTER WORLD
AUTOMATIC FOGGER
With Vapona® and Baygon®**

For homes, apartments, offices, basements, campers, boats, garages, plants, warehouses, boxcars, trucks, barns, kennels, and pet sitting areas.

FOGS UP TO 5,000 CU. FT.

Kills roaches, ants, ticks, fleas, small flying moths, and spiders.

ACTIVE INGREDIENTS

2-(1-methylheptyl) phenyl methylcarbamate*	1.00%
2,2-dichlorovinyl dimethyl phosphate†	0.47%
Related Compounds	0.03%
INERT INGREDIENTS	98.50%

*VAPONA is a Reg. TM of Shell Oil Company.
†BAYGON is Reg. TM of the Pirani Company of Lurentz & von Breyer GmbH, Leverkusen.

MEMPHIS, TN 38118

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Storage: Store in a cool, dry area away from heat or flame.

Dispose: Do not re-use empty container. Wrap container and put in trash can.

Use one canister for each 10' wide x 10' high unobstructed area. Example: 10' wide x 20' high = 500 cu. ft. Use additional units for remote rooms where free flow of the mist is not assured.

INHALATION: Cover exposed floors, fixtures, and food handling equipment. Do not enter and doors to areas to be treated. Shut curtains and air conditioners. Put out all open flames except pilot light. Remove pets and cover fish tanks or fish bowls with paper, or remove from area. Close exterior doors and windows.

TO START FOGGING: Place Fogger on table, chair or stand, at least 1½ feet from pilot light. Place several thicknesses of newspapers under canister to prevent marring of surface. Hold can at arm's length, with top of can pointing away from face and eyes. Push down on finger pad until it rocks—this will start fogging action. Set canister in upright position on table, etc., and leave building at once. DO NOT RE-ENTER BUILDING FOR TWO HOURS, then open exterior doors and windows and allow to air for one hour before reoccupying area. If additional units are used for remote rooms or where free flow of mist is not assured, increase airing out time accordingly.
