or other highly alkaline materials.

**LAWN SPRAY:** For ants, chinch bugs, earwigs, fleas, fall armyworm, mosquitoes, sod webworms (lawn moths) and millipedes. For best results treat after cutting and when the ground is moist from rain or irrigation using 1/2 pint in 15 to 20 gallons of water to each 500 square feet of established lawn. Apply with hose end or pressure sprayer with ample water to insure turf penetration. Repeat in 2 or 3 weeks if necessary.

**ORNAMENTAL PLANT SPRAY:** For flowers, shrubs and shade trees including roses, azaleas, mums, lilac, arborvitae, juniper, pine, birch, dogwood, oak and maple. (Do not use on Boston Ivy). Apply spray mixture containing 4 teaspoonsful per gallon of water (8 fl. oz. to 12 gallons or 1 quart to 50 gallons) when insects or damage appear. Repeat at weekly intervals or as necessary for such insects as bagworm, leaf miners, elm leaf beetle, gypsy moth, Japanese beetle, lacebug, rose slug, tent caterpillars, leaf rollers, scale insects and periodical Cicada.

**VEGETABLE GARDEN SPRAY:** Mix 2 oz. in 3 gallons of water (2 quarts in sufficient water for 1 acre). Spray when insects or damage appear and repeat at 7 to 10 day intervals when necessary. No post-treatment time limitations for the following host plants when material is applied in accordance with directions:

**BEANS** (green, lima, and snap)—Japanese and Mexican bean beetle, tarnished plant bug. **TOMATO, EGGPLANT & PEPPER**—leaf hopper, lacebug, tomato fruit worm. **PUMPKIN, SQUASH, CUCUMBER, MELON**—leaf beetle, melonworms, cucumber beetle, squash bug. Avoid excessive applications. Some leaf injury may occur if treatments are made when tender foliage is wet or in the presence of prolonged high humidity. Do not use on watermelons in Florida.
