

SANI WASH SANITIZER is a powerful disinfectant and germicide. It is recommended for use on all surfaces, including floors, walls, and ceilings. It is also effective against bacteria, viruses, and fungi. For best results, use SANI WASH SANITIZER in a solution of 1 part to 100 parts of water. It is safe for use on most materials, but should not be used on marble or waxed surfaces.

Directions for Use:

1. For general use, add 1/2 cup of SANI WASH SANITIZER to 10 gallons of water. This provides 100 ppm available chlorine. The higher concentration of 200 ppm is recommended for use on floors, walls, and ceilings. Dip a basket of rags in the solution and hold it for 2 or 3 minutes. Rinse with clean water.
2. For dishes, glasses, and other articles, dissolve 1/2 cup of SANI WASH SANITIZER in 10 gallons of water (125°F). This provides 100 to 200 ppm available chlorine, respectively. Dip and rinse articles for 2 or 3 minutes. Then dip the articles in clean water and hold for 2 or 3 minutes. Rinse with clean water and dry. The same solution may be used for floors, walls, and ceilings. For machine washing, use 1/2 cup of SANI WASH SANITIZER per gallon of water. For use in automatic dishwashers, use 1/2 cup of SANI WASH SANITIZER per gallon of water.

The amazing disinfecting power of SANI WASH SANITIZER is due to its active ingredients. It is safe for use on most materials, but should not be used on marble or waxed surfaces. For best results, use SANI WASH SANITIZER in a solution of 1 part to 100 parts of water. It is safe for use on most materials, but should not be used on marble or waxed surfaces.

WARNING!
 KEEP OUT OF THE REACH OF CHILDREN

SANI WASH SANITIZER is recommended for use in spray machines to sanitize and clean eggs prior to sale, on commercial eggs or to use on incubation eggs. **SANI WASH SANITIZER** is also recommended for use in sanitizing dishes, glasses, food processing equipment and utensils including dairy and brewery equipment and utensils.

Directions for use:

1. For Commercial Egg Wash - do not try to clean excessively dirty eggs or use water with over two parts per million iron content. Do not reuse wash water except when used in a continuous type washer. Wash eggs promptly after gathering in 90° F water temperature or higher. Maintain wash water temperature 20° F to 40° F warmer than the eggs. Spray rinse washed eggs with warm (125° F) potable water containing 1 to 2 oz. of **SANI WASH SANITIZER** per 10 gallons of water. This provides 100 to 200 ppm available chlorine respectively. Eggs should be reasonably dry before casing or breaking.

2. For dishes, glasses, food processing equipment, etc. - 1 or 2 oz. of **SANI WASH SANITIZER** per 10 gallons of water. This provides 100 to 200 ppm available chlorine respectively. For sanitizing food processing equipment, the solution should be maintained at 100 ppm available chlorine. If the solution is diluted, additional **SANI WASH SANITIZER** should be added to maintain a minimum of 100 ppm available chlorine.

WARNING!
 KEEP OUT OF REACH OF CHILDREN
 This product is a strong oxidizing agent. It may cause skin irritation. Avoid contact with eyes. If contact occurs, flush with water. Do not use in confined spaces. Do not mix with other chemicals. Do not use in food preparation areas. Do not use in areas where food is stored. Do not use in areas where food is prepared. Do not use in areas where food is served. Do not use in areas where food is consumed. Do not use in areas where food is stored, prepared, served, or consumed.
