SUGGESTIONS FOR USE ON COTTON

HELENA FIVE POUND CYTHION® EMULSION will control the following insects attacking cotton: Boll Weevil, aphids, leafworms, and some species of spider mites.

HELENA FIVE POUND CYTHION® EMULSION contains 5 pounds Cythion® per gallon. Water dilution of various strengths to be used is conventional and low volume sprayers (both ground and airplane applicators) can be prepared. HELENA FIVE POUND CYTHION® EMULSION is mixed with water by agitation or recirculating through spray pumps. If mixture is allowed to stand, re-mix before using.

Cythion® sprays are recommended to be at the rate of 1 gal. to 5 acres minimum—1 gal. to 3 acres maximum depending upon local conditions. For timing of applications, consult your State Agricultural Extension Service or Experiment Station.

Always use sufficient water for proper coverage.

Do not apply this product where there may be grazing by dairy animals or animals being finished for slaughter.

Do not contaminate feed or foodstuffs. When using this product suitable caution should be followed.

Do not apply this product within seven days of hand picking. Mix with 3-10 gallons water per acre for Aerial Application. Mix with 10-25 gallon water per acre for Ground Application.
