

**CAUTION**

**Keep Out of The Reach Of Children**

Harmful if swallowed. May cause irritation of eyes, nose, throat and skin. Avoid breathing dust. Avoid contact with skin, eyes, and clothing. Avoid handling with cuts or abrasions on hands and wear gloves. Wash clothing and equipment after application. Avoid contamination of irrigation water. Keep out of the reach of children and domestic animals. Avoid contamination of feed and foodstuffs, fertilizers, and seed.

**NOTICE**

BROMO-CLEAN is not selective in action and may be toxic to all vegetation and may make the entire treated area partially or totally unproductive for one or more years.

Do not apply on or near desirable trees or other plants or on other areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. DO NOT use on lawns, walks, driveways, tennis courts or similar areas. DO NOT apply near desirable plants. DO NOT contaminate domestic or irrigation waters.

Thoroughly clean application equipment after use. DO NOT use equipment with which BROMO-CLEAN has been applied for applying insecticides, fungicides, and fertilizers as plant injury may result.

DO NOT STORE WITH FOODSTUFFS.  
STORE IN A COOL, DRY PLACE.

Avoid direct contact with ground or concrete floors. Destroy bag after use - if by fire, stay out of smoke.

BROMO-CLEAN is a pelletized non-selective weed and grass killer, designed for long-term control. It may be applied to the surface of the soil or mixed with water and sprayed to plant foliage. The product is formulated for use on non-crop areas where barren soil is desired. Some of these areas are storage yards, industrial sites, around utility poles, railroad berm, highway shoulders, around substations, and similar areas where vegetation might create unsightly or fire hazardous conditions.

**DIRECTIONS**

**DRY APPLICATIONS:** Use BROMO-CLEAN directly from the bag or dispense with a seeder, power spreader, coffee can or other containers that will allow even distribution of the product. Before applying, measure area to be treated and select the rate for desired treatment. Calibrate over a small area and get even coverage with the rate selected. Rainfall is required to dissolve the pellet. Allow a few days after the pellet has dissolved for the results to appear.

# HELENA

## BRAND

# BROMO-CLEAN

COMPLETE WEED AND GRASS KILLER FOR NON-CROP AREAS. SINGLE TREATMENT WILL GIVE KNOCK-DOWN OF VEGETATION PLUS LONG-LASTING PREVENTION OF SEEDLINGS AND REGROWTH.

Read This Label Before Using Product

**DRY APPLICATION:** Ready to use from the bag.  
**SPRAY APPLICATION:** Mix with water and spray.

SEE OTHER CAUTION STATEMENTS ON SIDE PANEL.**

**INGREDIENT STATEMENT**

<b>ACTIVE:</b>	
Sodium Metaborate	54.0%
Sodium Chlorate	41.0%
Bromacil (5-bromo-5-sec-butyl-6-methyluracil)	4.0%
<b>INFERT:</b>	1.0%
Total	100.0%

Equivalent to 5.03% boron expressed as elemental boron.

HELENA CHEMICAL COMPANY

**SPRAY APPLICATION:** Use BROMO-CLEAN as a spray for quick knock-down of existing vegetation. Thoroughly cover all parts of the plant and spray to the point of run-off. For best results, completely dissolve the product in a small amount of water prior to pouring into the spray tank. Use spray equipment with mechanical agitation. It is possible to dissolve up to 3 lbs. of BROMO-CLEAN in 1 gallon of water.

**SPOT APPLICATION:** Use BROMO-CLEAN dissolved in proper quantity of water and apply with a sprinkler can or other suitable dispenser.

APPLICATION RATES:	SPRAY	DRY
<b>EASY TO KILL:</b> Weeds and grasses, downy brome, Russian thistle, pigweed, crabgrass, sunflower, and shallow-rooted plants.	1/2 lb. in 1 gallon per 100 sq. feet	1/2 lb. per 100 sq. feet
<b>HARD TO KILL:</b> Weeds and grasses, Johnsongrass, Dallis grass, quackgrass, Bermuda-grass, Canada thistle, field bindweed, bluegrass, and deep-rooted plants.	1 lb. in 1 gallon per 100 square ft	1 lb. per 100 sq. ft
<b>MIXED EASY AND HARD TO KILL:</b> Annual and perennial weeds and grasses	1 lb. in 1 gal. per 100 sq. ft.	1 lb. / 100 sq. ft.

The degree of control and duration of effect will vary with the amount of chemical applied, soil types, rainfall, and other conditions. The product requires rainfall or artificial watering in order for it to be released into the soil.
