

CAUTION

HARMFUL IF SWALLOWED!

USE PRECAUTIONS!

The Federal Food and Drug Administration has set official tolerances for certain pesticide residues. In order that residues on food and forage crops will not exceed established tolerances, use only at recommended rates, and do not apply closer to harvest than specified. Consult local agricultural authorities for additional information, as the timing, number and rate of applications needed will vary with local conditions.

RECOMMENDATIONS

APPLES: Melanose, Scab - Use 1 1/2 lbs. per 100 gallons of water. Do not use more than 4 1/2 lbs. per acre per application. Apply during dormant season and 3 weeks after petal fall.

CABBAGE: Downy Mildew - Use 4 lbs. per 100 gal. water. Do not use more than 7 1/2 lbs. per acre per application. Apply at 7-10-day intervals until a few days before harvest.

CUCUMBERS: Blight, Septoria Leaf Spot - Use 4 lbs. per 100 gal. water. Do not use more than 9 4/5 lbs. per acre per application. Apply at 7-10-day intervals until a few days before harvest.

NI-COP

An Insoluble Neutral Copper
Agricultural Fungicide - Micronized

CAUTION KEEP OUT OF REACH OF CHILDREN.
