A FERBAM FUNGICIDE

5905-326

RECOMMENDATIONS

FOR TOBACCO BLUE MOLD CONTROL start dusting when plants are about the size of a lime or when Blue Mold is first reported in the area. Use at the rate of 1 to 3 pounds of FERBAM 11.4% DUST per 100 sq. yds. Use rotary or hand duster to apply. Cover all parts of the plant with a thin film of dust. Repeat twice a week and after rains until transplanting. The best coverage and protection are obtained if applications are made when conditions are favorable for dusting.

CAUTION: Use of this material in a manner or at a time other than in accordance with the directions may produce plant injury, excessive residues or other undesirable results.

USE ONLY AS RECOMMENDED!

A FERBAM FUNGICIDE

5905-326

RECOMMENDATIONS

FOR TOBACCO BLUE MOLD CONTROL: Dusting when plants are in the early stages of growth. Apply at the rate of 1 to 2 pounds of Ferbam 11.4% per acre. Cover all parts of the plant with a thick dust. Do not apply to plants that are wilting. The best coverage and protection are obtained by applying the dust in the early morning or late afternoon.

CAUTION: Use of this material in a manner or a time other than that recommended may result in plant injury, excessive residues or other undesirable results.
