

### CAUTION

Do not use wettable sulfur in combination with oil emulsion. Any application of sulfur should not be closer than 3 weeks to an oil application.

Citrusperse Sulphur is a wettable formulation of finely ground sulphur with special suspending and adhering qualities that maintain active residues on citrus trees for extended periods of time, once leaves are allowed to dry.

Although sulphur kills rust mite by fumigation as well as contact, thorough coverage is absolutely necessary for best results.

EPA Reg. No. 5905-350

# HELENA

# CITRUSPERSE SULPHUR

**CAUTION** KEEP OUT OF REACH OF CHILDREN.  
SEE OTHER CAUTION STATEMENTS ON SIDE PANEL.

ACTIVE INGREDIENT	BY WEIGHT
Sulphur as Elemental	90.0%
INERT INGREDIENTS	10.0%
TOTAL	100.0%

### RECOMMENDATIONS

Use 30 Pounds Citrusperse Sulphur in 500 gallons water for the control of rust mites on citrus.

Spray programs to control insects, mites, and diseases make possible good external fruit quality and prevention of fruit, leaves and wood. Good coverage of sprays and dusts is essential to good control.

For more detailed information about all pests, consult the Florida Guide to Citrus Insects, Diseases, and Nutritional Disorders; and Fla. Agr. Ext. Cir. 137B, Insects and Mites of Florida Citrus.
