Citrusperse Sulphur is a wettable formulation of finely ground sulphur with special suspending and adhering qualities that maintain active residues on citrus trees for extended periods of time, once leaves are allowed to dry.

Although sulphur kills rust mite by fumigation as well as contact, thorough coverage is absolutely necessary for best results.

Use 30 pounds Citrusperse Sulphur in 500 gallons water for the control of rust mites in citrus.

Do not use wettable sulphur in combination with oil emulsion. Any application of sulphur should not be closer than 3 weeks to an oil application.
