A PLEASANT WAY TO HANDLE AN UNPLEASANT JOB

STERI-BOWL—A triple-action toilet bowl and urinal cleaner packaged in gallon and quart plastic bottles. "De-scales . . . Disinfects . . . Deodorizes" in one operation. Extreme high foaming and detergent action dissolves and removes stubborn stains. Leaves bowls and urinals odor-free and disinfected.

DIRECTIONS FOR USE

For cleaning and disinfecting of heavily stained fixtures: Pour small amount of STERI-BOWL cleaner into plastic pitcher. Whip into suds with cleaning mop and apply by beginning under flushing rim first. Allow heavy suds to remain a few minutes on stained areas. If several fixtures are to be treated, go on to others while allowing first ones to soak. Return to first fixture and rub briskly with mop, first up under flushing rim, working down to bottom of bowl.

Wring out mop on each fixture by rolling mop under rim of toilet squeezing out diluted mixture. Seats and entire outside of fixture may be wiped down at this time.

For stains below water line, or in traps, pour one cup of cleaner into urinal trap and pipes. Allow to remain for 15 to 30 minutes or over night if extra heavily stained. Do not stir or agitate during soaking period in traps. After proper waiting time, rub off the stains with mop, working mop as far down into trap as possible.
