**STORAGE AND DISPOSAL**

**STORAGE**  
Reclose container of unused para moth. Store in a dry place.

**DISPOSAL**  
Do not reuse empty container. Wrap and put in trash collection.

**WARRANTY STATEMENT**

Seller makes no warranty, express or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. User assumes all risks of use, storage or handling not in strict accordance with accompanying directions.

most effective at temperatures above 70° and volatilizes more rapidly as the temperature rises.

Stored materials should be inspected at intervals of 2 - 3 weeks, depending on the temperature of the storehouse and the prevalence of moths. Supers should be aired before being given back to the bees.

between them covered with strips of gummed paper. Three ounces of the crystals to a stack of five 10-frame hive bodies may be sprinkled directly on the top bars of the frames or preferably put on a piece of paper or cardboard laid on the top bars. The cover should then be put tightly in place. At intervals during the storage season the covers of the stacks should be raised and if no crystals are still present, more should be added. Para Moth is

Para Moth is a white crystalline substance which evaporates slowly in the air. It is heavier than air, non-inflammable, and non-explosive.

Directions for Use in control of wax moth in stored bee combs, free of honey.

In Para Moth fumigation, the supers should be stacked as tightly as possible and the cracks
