## FOR USE AS A SOIL AMENDMENT

For alkaline soil correction and improvement of water penetration, use 10 gallons per acre of Lime-Sulfur Solution in irrigating water on growing plants.

For preplanting treatment, use 20 to 30 gallons per acre of Lime-Sulfur Solution in irrigating water.

## CAUTION

Some fruits and other plants are susceptible to injury from sulfur under certain climatic conditions. The user is advised not to use sulfur on any crop unless local use has proved that sulfur does not damage crops in that locality.
