# TIME SAVER

## DETERGENT-SANITIZER

### IODOPHOR TYPE

#### Active Ingredients

Isoctyl phenoxy polyethoxy ethanol iodine  
complex 18.0%  
(Providing 1.75% titratable iodine)

Phosphoric Acid 20.0%

**Inert Ingredients 62.0%**

An iodine-based detergent-sanitizer-disinfectant which  
is non-staining as well as self-indicating in use dilutions

#### TABLE OF DILUTIONS

1 oz. Detergent-Sanitizer in 5 gallons of water gives  
25 ppm titratable iodine.

EPA REG. NO. 5991-7

TIME SAVER Detergent Sanitizer is an Iodophor type  
general cleaner combining effective germicidal and  
bactericidal properties with excellent cleaning ability.  
In use dilutions, it may be used by personnel without  
gloves or other safety equipment and will effectively  
clean porous as well as smooth surfaces.

#### DIRECTIONS FOR USE

Cleaning of Bar and Restaurant Dishes, Glassware, Etc.

#### DIRECTIONS FOR USE - (Continued)

##### For Cold Wall Farm Storage Tanks

Pre-mix with filtered water until all milk is washed  
out.  
Add this mixture to tank containing 100 gallons Deter-  
gent Sanitizer and stir thoroughly. After  
10 minutes, pump out and wash tank with water.

Milkstone Removal

## TABLE OF DILUTIONS

1 oz Detergent-Sanitizer in 5 gallons of water gives  
25 ppm titratable iodine.

INDA 385 1/2 1/2 1/2 1/2

**TIME SAVER** Detergent-Sanitizer is an iodophor type general cleaner combining effective germicidal and bactericidal properties with excellent cleaning ability. In use dilutions, it may be used by personnel without gloves or other safety equipment and will effectively clean porous as well as smooth surfaces.

### DIRECTIONS FOR USE

#### Cleaning of Bar and Restaurant Dishes, Glassware, Etc

Add 1/2 ounce of Detergent - Sanitizer to 5 gallons of water in wash sink number one. Rinse in sink number two in clear water. Sanitize in sink number three using 1/2 ounce of Detergent-Sanitizer in 5 gallons of water. Dishes and glassware should air dry.

#### Cleaning of Dairy Utensils and Equipment

1. Thoroughly flush with cold or tepid water.
2. Wash with a solution of 1 ounce of Detergent-Sanitizer to each 5 gallons of lukewarm water (90 F).
3. Rinse with clean, warm water.
4. Before each milking, sanitize by rinsing with a solution of 1 ounce Detergent-Sanitizer to each 5 gallons of water.

## TIME CHEMICAL INC.

10000 1/2 1/2 1/2 1/2  
10000 1/2 1/2 1/2 1/2

### DIRECTIONS FOR USE - (Continued)

#### For Cold Wall Farm Storage Tanks

1. Pre-Flush with tepid water until all milk is washed out.
2. Wash with a solution containing 1 ounce of Detergent-Sanitizer to each 5 gallons of cold water.
3. Brush thoroughly, drain and rinse for at least 5 minutes.

#### Milkstone Removal

Milkstone can be removed by brushing equipment with a Detergent-Sanitizer solution of 3 to 4 ounces per gallon of warm water followed by a clean water rinse. The formation of milkstone can be prevented by the daily use of Detergent-Sanitizer.

### NOTE

Germicidal activity remains as long as the iodine color is visible in solution. When the color disappears, new solutions should be prepared.

### PRECAUTIONS

Do not mix Detergent Sanitizer with any soaps or other cleaners. In case of contact of the concentrate with the eye, flush with plenty of water. If irritation persists, get medical attention. **AVOID CONTAMINATION.**

Harmful if swallowed. Causes skin irritation. Avoid contact with skin and eyes.
