FLY-NO MEDIC CARPET BLOCK

GUARANTEED ANALYSIS:

Crude Protein, not less than	5.00%
Crude Fat, not less than	1.00%
Crude Fiber, not more than	10.50%
Calcium (Ca), not less than	3.00%
Calcium (Ca), not more than	4.00%
Phosphorus (P), not less than	1.50%
Iodine (I), not less than	0.035%
Salt (NaCl), not less than	19.00%
Salt (NaCl), not more than	22.00%
Vitamin A, not less than	30,000 USP Units per lb.
Vitamin D2, not less than	3,000 USP Units per lb.
Vitamin D3, not less than	3,000 USP Units per lb.

INGREDIENTS:

Dried Cane Molasses, Cane Molasses, Salt, Calcium Carbonate, Defluorinated Phosphate, Soybean Meal, Vitamin A Palmitate (stability improved), Irradiated Dried Yeast and D-Activated Plant Sterol (sources of Vitamin D2), D-Activated Animal Sterol (source of Vitamin D3), Iron Oxide, Iron Carbonate, Zinc Oxide, Manganese Oxide, Copper Oxide, Cobalt Carbonate, Petrolatum, Natural and Artificial Flavors Added.

CAUTION: - Keep out of reach of children.
This product is not to be fed to lactating dairy animals.

FEEDING DIRECTIONS

Offer free choice to sheep and goats in order that each head will receive 2 oz. per head daily to supply one (1) gram of phenothiazine as an aid in the prevention of stomach worms, hook-worms and nodular worms. DO NOT FEED ADDITIONAL SALT. Blocks should be located near the animals' water supply or near their loafing area. In order to ensure proper horn and face fly breeding control, animals should have these blocks available at all times. Offer Ade Fly-NO: Medic-Carpet in the proper amounts from early summer until freeze.

It is suggested that cattle be sprayed once in early summer to reduce horn fly adult population and immediately follow with the above program. Phenothiazine is not effective against existing adult flies. For internal parasite control, these Blocks should be fed on a year-round basis to cattle, sheep and goats at the proper level.

Offer Ade Fly-NO: Medic-Carpet BLOCKS MEDICATED free choice to cattle in order that the following amounts will be consumed based on body weight:

400 Lbs. - 2 oz. per head daily
600 Lbs. - 3 oz. per head daily
800 Lbs. - 4 oz. per head daily
1000 Lbs. - 5 oz. per head daily

Each 1/2 oz. supplies 1/4 gram phenothiazine which is the dosage for 100 lbs. of body weight daily for preventing the breeding of horn and face flies in the manure of treated animals. The same level aids in the prevention of stomach worms, hook-worms and nodular worms in cattle.
