Product

Tested and Approved

This algicide is formulated to complement swimming pool water treated with normal chlorine systems. especially effective against growth of aleae and non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system.

This algicide is compatible with all che.p! used in swimming pool maintesance: concentrated form this chemical contact with high concentrations of chi THIS ALGICIDE AND CHLORINE TOGST to the pool. These chemic. Shou separately.

This algicide is economical, effice is stable

DIRECTIONS

Clean the pool before initial application. For an initial application use one gallon of this algicide per 25,000 gallons of water. Use one quart per 50,000 gallons of water every fifth to seventh day depending on weather and use factors.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy acc imulation of algae growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or ACCERTED 1-11

ACTIVE INGREDIENTS:

Alkyl [C14, 58%, C16, 28%; C12, 14% dimethyl benzyl ammonium chloride INERT INGREDIENTS: 90%
