CAUTION

HARMFUL IF SWALLOWED. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs. Keep children and pets off treated lawns or turf until the material has been washed into soil by watering or rain, and grass is thoroughly dry. Avoid breathing of dust.

This product will kill fish and wildlife. Keep out of lakes, streams and ponds. Birds feeding on treated areas may be killed. Do not apply where run-off is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of wastes.

Apply this product only as specified on label. Crush container when empty, and dispose of by burying with wastes, or by burning. (Keep out of smoke).

TERMITE CONTROL: Dig trench 8" wide and 15" deep along entire exterior wall foundation. Use 4 pounds of **TERRADANE** to every 25 feet of trench and backfill. For deeper foundations, dig 30" trench, and apply 8 lbs. of **TERRADANE** per 25 feet. Do not dig below footing. Water in well before filling trench. Inspect yearly to determine need for re-treatment.

TERRADANE

GRANULATED

FIVE-YEAR SOIL AND LAWN TREATMENT

NO MIXING— SPRINKLE FROM CAN TO CONTROL CERTAIN LAWN AND SOIL INSECTS

ACTIVE INGREDIENTS:

Technical Chlordane*	25.00%
INERT INGREDIENTS	75.00%
Total	100.00%

*Equivalent to 15% Octachloro-4,7-methanotetrahydroindane and 10% of related compounds.

**CAUTION: Keep out of reach of children.
See side panel for additional cautions.**

NET CONTENTS 1 POUND

DIRECTIONS:

SOIL INSECT CONTROL: Ants, European Chafer Larvae, Japanese Beetle Larvae, Mole Crickets, Sod Webworms, White Fringed Beetle Larvae and Asiatic Beetle Larvae: Apply three ounces of **TERRADANE** to 250 square feet, and water in well. This is equivalent to five tablespoons. One pound will treat up to 1200 square feet. **TERRADANE** granules can be sprinkled directly from the can, after a few holes have been punched in the lid. Apply half the dosage from left to right, and the rest at right angles to the first application. Established lawns can be treated from early April to late November. New lawns can be grub-proofed in Spring or Fall by mixing **TERRADANE** into the top few inches of soil at the recommended rate before seeding. It is extremely important that the **TERRADANE** be rained or watered into the soil to a depth of at least 4". Pests are controlled for up to 5 years.

SURFACE INSECTS: Armyworms, Ants, Cutworms, Centipedes, Chiggers, Chinch Bugs, Earwigs, Grasshoppers, Lawn Moths, Millipedes, Mosquitoes, and Ticks may be controlled by light monthly applications. Apply to lawn surface, ant hills, trash heaps and puddles. One pound of granules will treat up to 5000 square feet of area.
