

## USE DIRECTIONS

### FOR CLEANING

Lightly soiled areas – surfaces to be cleaned should be mopped or brushed with a solution containing 1 ounce of Mint Disinfectant per gallon of water. Rinse cleaned area with fresh water.

Heavily soiled areas – mop or brush soiled surface with a solution containing 2 ounces of Mint Disinfectant per gallon of water. Rinse cleaned surface with fresh water.

To disinfect walls, floors and other hard surfaces in homes, schools, restaurants,

### GENERAL PURPOSE DISINFECTION

rest rooms and other public areas, mop or brush surface to be treated with a solution containing 1 ounce of Mint Disinfectant per gallon of water. Surfaces that are heavily soiled should be cleaned with 2 ounces of Mint Disinfectant per gallon of water and then disinfected. All treated food contact surfaces and/or equipment must be thoroughly scrubbed with detergents and rinsed with potable water prior to re-use. To disinfect locker rooms, shower stalls, walkways around pools and other areas against pathogenic fungi, mop area with a solution containing 1 ounce of Mint Disinfectant in 1 gallon of water. This solution will destroy **Trichophyton mentagrophytes**, a causative agent of athlete's foot.

### HOSPITAL DISINFECTION

To disinfect walls, floors, furniture and other hard surfaces in hospitals and nursing homes, mop or brush surface to be treated with a solution containing 1 ounce of Mint Disinfectant per gallon of water. Those surfaces that are heavily soiled with blood, fecal material or exudates should be thoroughly scrubbed with a solution containing 2 ounces per gallon of water and then rinsed with a fresh solution containing 2 ounces per gallon of water before disinfection.

# MINT DISINFECTANT

Phenol Coeff: S. aureus – 15

S. typhosa – 9
