

DIRECTIONS

1. In freshly filled pools, or pools showing no visible algae growth add one gallon Clean-Away Algaecide per 50,000 gallons of water to prevent algae growth.
2. If algae growth is observed, add one gallon Clean-Away Algaecide for each 20,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add one gallon Clean-Away Algaecide per 50,000 gallons of water.
3. If the pool water treated in (1) or (2) is recycled, add one gallon of Clean-Away Algaecide per 50,000 gallons of water every five to seven days to maintain between two and five parts per million active ingredient. See serviceman for test kit.
4. If the pool water treated as in (1) or (2) above is not recycled, or not filtered, it should be tested periodically to determine the active ingredient content. When necessary, one gallon Clean-Away Algaecide per 50,000 gallons of water should be added to maintain two to five parts per million of active ingredient.

Drums Only: Do not reuse empty drums. Return to drum conditioner or destroy by perforating or crushing and burning in a safe place away from water supplies. Other containers... rinse container (Empty) thoroughly with water and discard it by crushing or burning in a safe place.

Quaternary content of pools may be checked in accordance with the procedure outlined in SAN-60. Test kits can be obtained from the following: W. A. Taylor Company, 7300 York Road, Baltimore, Maryland or from LaMotte Chemical Products Company, Chestertown, Maryland.

Clean-Away

Swimming Pool Algaecide

ACTIVE INGREDIENT

n-Alkyl (50% C₁₄, 40% C₁₂, 10% C₁₆) dimethyl benzyl ammonium chloride 10%

INERT INGREDIENTS 90%

EPA Registration No. 6125-15

DANGER

KEEP OUT OF REACH OF CHILDREN. Corrosive, causes severe eye and skin damage. Do not get in eyes, on skin or on clothing.

Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

See rear panel for additional precautions

Net Contents Gallons

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent, convulsions may be controlled by the cautious intravenous injection of a short-acting barbituate drug.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label. The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor and increased chlorine demand of the water. The use of Clean-Away Algaecide will help to maintain the water in a clean condition.

Clean-Away Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with Clean-Away Algaecide, the chlorine demand of the pool may be significantly reduced.
