### DIRECTIONS FOR USE

To control most weeds and grasses for extended periods on non-cropland areas, such as Industrial Plant sites, parking lots, loading ramps and around storage buildings and similar non-crop areas, apply 1 to 4 gallons per 1000 square feet of WEED KILLER A after the most predominant weed have emerged. No agitation is required. Do not apply to areas under laid by roots of desirable trees and shrubs. WEED KILLER A can be applied with standard spray equipment. For treating small areas, a tank type sprayer or sprinkling can may be used. NOTE: Users should consult State Agricultural Experiment Stations or Extension Service Weed Specialists for recommendations as to use of WEED KILLER A in their particular area.

**IMPORTANT:** Do not apply directly to, or otherwise permit WEED KILLER A to contact susceptible plants as this product may injure cotton, beans, peas, grapes, flowers, fruit trees, ornamentals, or other desirable plants. Avoid spray drift to such susceptible plants (coarse sprays are less likely to drift). Vapors from this product may injure susceptible plants in the immediate vicinity. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes (or do not use same equipment for other purposes). Do not store near fertilizers, seeds, insecticides or fungicides. Do not re-use this container.
