

INTENSIFIED SANI- BACTOL

Micro-Mist Compatible

ANTI-BACTERIAL DETERGENT FOR ONE-STEP CLEANING

A Concentrated Bactericidal Formulation Combined With Non-Ionic Biodegradable Detergents for Compatible One-Step Cleaning of Floors, Walls And All Hospital Surfaces And Equipment.

U.S.D.A. REG. NO. 6142-8

CAUTION: "KEEP OUT OF REACH OF CHILDREN"

"SEE RIGHT PANEL FOR ADDITIONAL CAUTIONS"

11-13 East Illinois Street
Chicago, Illinois 60611

Add ½ ounce of INTENSIFIED SANI-BACTOL to the water at room temperature for use as a combined disinfectant. For immediate use as a combined disinfectant, apply INTENSIFIED SANI-BACTOL to the surface. If not killed instantly, the surface should be re-treated with SANI-BACTOL before it dries. The residual dry film of INTENSIFIED SANI-BACTOL is bacteriostatic condition until removed.

INTENSIFIED SANI-BACTOL is the recommended use dilution. The recommended use dilution is enough to rapidly destroy bacteria. The disinfection is extremely effective and leaves a microscopic film of bacteriostatic surface until removed. Directions: Use ½ ounce of INTENSIFIED SANI-BACTOL per gallon of water.

ACTIVE INGREDIENTS: n-Alkyl Dimethyl Ammonium Chloride, Metacresol, Chloroacetic Acid, Chloroacetate, n-Alkyl (50% C-12 to C-14)

INERT INGREDIENTS: Deionized Water, Sodium Phosphate, Color.

CAUTION: HARMFUL IF IN CONTACT WITH SKIN AND EYES. IF EYE IRRITATED, FLUSH WITH WATER. IF EYE IRRITATED, FLUSH WITH WATER.

DIRECTIONS FOR USE

Add ½ ounce of INTENSIFIED SANI-BACTOL to each gallon of tap water at the desired temperature for use as wash solution. This produces a uniform mixture ready for immediate use as a combined detergent, disinfectant and bactericidal agent. For disinfection, apply INTENSIFIED SANI-BACTOL wash solution after cleaning surface. Since bacteria are not killed instantly, the longer the time of contact of the bacteria with INTENSIFIED SANI-BACTOL before it dries, the better the result.

The residual dry film of INTENSIFIED SANI-BACTOL successfully maintains surfaces in a bacteriostatic condition unless removed by friction, or washing.

PRODUCT DESCRIPTION

INTENSIFIED SANI-BACTOL is a highly concentrated detergent and disinfecting agent. In the recommended use dilution it produces a solution whose phenol coefficient is high enough to rapidly destroy most pathogenic organisms in less than five minutes. This solution is extremely effective against *Staphylococcus aureus*. As the applied solution dries it leaves a microscopic film of active substances that are capable of maintaining a bacteriostatic surface until removed by frictional rubbing or wiping contact.

Directions: Use ½ ounce of INTENSIFIED SANI-BACTOL for each gallon of tap water.

FORMULA

ACTIVE INGREDIENTS: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) Dimethyl Benzyl Ammonium Chloride, Methyl Alcohol, Ortho-Phenylphenol, Sodium Ethylene diaminetetraacetate, n-Alkyl (50% C12, 30% C14, 17% C16, 3% C18) Isoquinolinium Bromide.

TOTAL: 20.177%

INERT INGREDIENTS: Deionized Water, Nonylphenoxypolyethoxyethanol, Sodium Tripolyphosphate, Color.TOTAL: 79.823%

PHENOL COEFFICIENT:

Methods of Analysis A.O.A.C.—1965)

<i>Staphylococcus aureus</i>	50
<i>S. Typhosa</i>	30

CAUTION: HARMFUL IF SWALLOWED. AVOID CONTAMINATION OF FOODS. "AVOID CONTACT WITH SKIN AND EYES. IN CASE OF CONTACT FLUSH WITH PLENTY OF WATER". IF EYE IRRITATION SHOULD PERSIST CONSULT PHYSICIAN.
