LOFT'S PEDIGREED SEED COMPANY  
CHIMNEY ROCK ROAD  
BOUND BROOK, NEW JERSEY

Directions for use

LOFT'S DANDELION AND BROADLEAF LAWN WEED KILLER is a combination of 2,4-D Amine and Silvex on a lightweight carrier. Its function is to control broadleaf weeds such as:

~~Plantain~~  
~~Buckhorn~~  
~~Thistle~~  
~~Ragweed~~  
~~White Clover~~

~~Dandelion~~  
~~Common Chickweed~~  
~~Mouse-eared Chickweed~~  
~~Sour Grass~~  
~~Clover~~

~~Wild Carrot~~  
~~Wild Onion~~  
~~Pigweed~~  
~~Lamb's Quarters~~  
~~And many other.~~

The combination of ingredients is very effective, economical and easy to use.

LOFT'S DANDELION AND BROADLEAF LAWN WEED KILLER can be used in the Spring, Summer or Fall. However, the best results are obtained when the weeds are growing vigorously. When using this product strive to distribute it uniformly and to retain the granules on the leaves of weeds. The following suggestions will assist:

1. The contents of this bag are to cover a 5000 sq. ft. area (50' x 100'). This can best be accomplished using a spreader.
2. Apply between mowings to provide sufficient leaf surface to be treated.
3. Sprinkle lawn prior to application or apply after a light rainfall.
4. Delay application when rain is predicted.
5. Do not water lawn for 24 hours after application.
6. Avoid application on windy days to avoid drift to surrounding plants.
7. Do not treat newly seeded lawns until grasses are well established or at least until after third mowing.

SUGGESTED SPREADER SETTINGS

Lawn Beauty	8
Scott's	6
Jackson	5
Cyclone	3

These suggestions are for your guidance in spreading, and are in no sense a guarantee of exact application. Age, condition of spreader, speed of operation and roughness of terrain can cause variations in the rates applied.

CAUTION: Avoid inhalation or contamination of food stuffs. Avoid contact with skin, eyes or clothing. Wash hands after using. Do not store near fertilizer, seeds, insecticides or fungicides. Do not allow dust to drift onto susceptible plants such as ornamentals, vegetables, etc. Do not apply to stoloniferous grasses (those with underground stems) such as bents, bermudagrass or St. Augustine. Do not use on clover if you desire it to remain in the lawn. Certain desirable grasses may exhibit slight browning but will recover after a short period if the product has been used as directed. Vapors from this product may cause injury to susceptible plants growing in the immediate vicinity.
