

STAIN-AID LL9 has been formulated to aid in the reduction of cross-contamination in institutions, schools and hospitals.

STAIN-AID LL9 is a one-step disinfectant-cleaner that is effective against a broad spectrum of bacteria, is virucidal, fungicidal, and will prevent the growth of mold and mildew and their odors when used as directed. STAIN-AID LL9 is an effective one-step sanitizer-cleaner for use on non-food contact surfaces.

When used as directed, STAIN-AID LL9 will deodorize surfaces in toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause mal odors.

Precautionary Statements

Hazards to Humans and domestic animals

DANGER

Keep out of reach of children. Corrosive. Causes severe eye and skin damage. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food.

STORAGE AND DISPOSAL

—DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL

—OPEN DUMPING IS PROHIBITED

—DO NOT REUSE EMPTY CONTAINER

PESTICIDE DISPOSAL

PESTICIDE, SPRAY MIXTURE OR RINSATE THAT CANNOT BE USED OR CHEMICALLY REPROCESSED SHOULD BE DISPOSED OF IN A LANDFILL APPROVED FOR PESTICIDES OR BURIED IN A SAFE PLACE AWAY FROM WATER SUPPLIES.

CONTAINER DISPOSAL

TRIPLE RINSE (OR EQUIVALENT) AND DISPOSE IN AN INCINERATOR OR LANDFILL APPROVED FOR PESTICIDE CONTAINERS, OR BURY IN A SAFE PLACE.

GENERAL

CONSULT FEDERAL, STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES SUCH AS LIMITED OPEN BURNING.

STAIN-AID LL9
 Disinfectant-Cleaner-Sanitizer
 Fungicide-Mildewstat-Virucide-Deodorizer
 with Organic Soil Tolerance for Hospitals,
 Institutional and Industrial Use

Active Ingredients

- Octyl Decyl Dimethyl Ammonium Chloride 14%
- Dioctyl Dimethyl Ammonium Chloride 57%
- Didecyl Dimethyl Ammonium Chloride 57%
- Alkyl (C₁₄, 50%; C₁₂, 40%, C₁₀) 10%
- Dimethyl Benzyl Ammonium Chloride 1.52%

Inert Ingredients

- 96.20%
- 100.00%

KEEP OUT OF REACH OF CHILDREN

DANGER

Statement of Practical Treatment

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

Directions for Use

GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STAIN-AID LL9 is a proven one step cleaner-disinfectant-sanitizer-fungicide-mildewstat-virucide in the presence of moderate amounts of organic soil. Apply STAIN-AID LL9 to walls, floors and other hard (non-porous) surfaces such as tables, chairs, countertops, sinks and bedframes with a cloth mop or mechanical spray device so as to thoroughly wet surfaces. For heavily soiled areas a preliminary cleaning is required. Prepare a fresh solution daily or when use solution becomes visibly dirty.

Disinfection — to disinfect hard, non-porous surfaces in hospitals, add 2 oz. per gallon of water. Treated surfaces must remain wet for 10 minutes. At this use-level, STAIN-AID LL9 is also virucidal, fungicidal and mildewstatic. At 1 oz. per gallon STAIN-AID LL9 will disinfect hard non-porous surfaces in schools, industry and non-medical institutions.

Sanitizing — To sanitize porous or non-porous, non-food contact surfaces, add 1/2 oz. per gallon of water. Treated surfaces must remain wet for 60 seconds.

For hospitals and nursing homes, add 2 oz. per gallon of water. The broad spectrum of STAIN-AID LL9 has been evaluated in the presence of 5% serum and found to be effective against the following organisms by the AOAC Use-Dilution test:

- Pseudomonas aeruginosa
- Staphylococcus aureus
- Salmonella choleraesuis
- Escherichia coli
- Serratia marcescens
- Klebsiella pneumoniae
- Enterobacter aerogenes
- Salmonella schottmuelleri
- Streptococcus faecalis
- Shigella dysenteriae
- Brevibacterium ammonigenes

AOAC Fungicidal Test
 STAIN-AID LL9 at 1 oz. per gallon is effective fungicide against Trichophyton mentagrophytes (the athlete's foot fungus) when used on surfaces in areas such as locker, dressing rooms, shower and bath areas, exercise facilities, etc.

Mold and Mildew Control
 At 1 oz. per gallon, STAIN-AID LL9 will effectively inhibit the growth of mold and mildew and the odors caused by them when applied to hard, non-porous surfaces (as indicated in general instructions above). Allow to dry on surface and repeat when mildew growth returns.

Virucidal Performance
 At 1 oz. per gallon use-level, STAIN-AID LL9 was evaluated in the presence of 5% serum and found to be effective against Influenza A/Brazil Virus on manmade environmental surfaces.

For schools, non-medical institutional and industrial uses: At 1 oz. per gallon of water, STAIN-AID LL9 delivers excellent cleaning and germicidal effectiveness. It is effective against Staphylococcus aureus, Salmonella choleraesuis and Escherichia coli. The same AOAC tests used above to confirm suitable performance for hospitals were used.

Sanitizing-Non-Food Contact Surfaces (such as floors, walls, tables, etc.): At 1/2 oz. per gallon use level, STAIN-AID LL9 is an effective sanitizer against Staphylococcus aureus and Klebsiella pneumoniae in the presence of 5% serum on porous and non-porous environmental surfaces.
