U.S.D.A. REG. NO. 61523

ATOMIC CHEM PROCESS

INSECT KILLER

SURFASPRAY

**FOR GRAIN SURFACES
FULL BINS
SPRAY OR FOG**

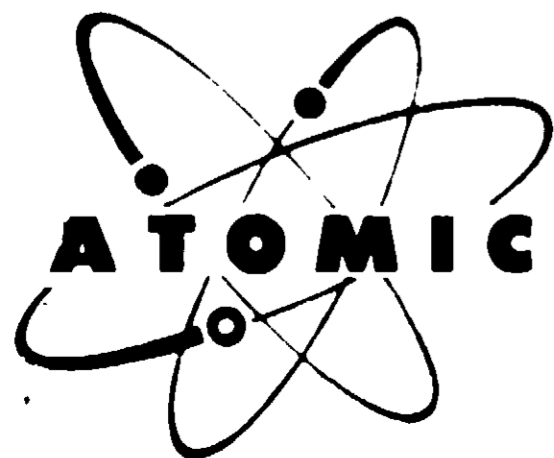

ACCEPTED

11-3-70

UNDER THE FEDERAL INSECTICIDE ACT
REGISTERED AND LISTED BY THE
EPA REG. NO. 61523
EPA UNDER NO. 61523

ACTIVE INGREDIENTS:
TECHNICAL PIPERONYL BUTOXIDE
Equivalent to 1.02% of (Butylcarbityl)
(6-Propylpiperonyl) Ether and 0.25%
of related compounds 1.27%
PYRETHRINS 0.13
PETROLEUM OIL 98.60

100.0

ATOMIC CHEMICAL CORP.

BOX 1111 SPOKANE, WASHINGTON

CAUTION:
KEEP OUT OF REACH OF CHILDREN

SURFASPRAY

SURFASPRAY MAY BE USED DIRECTLY ON STORED GRAIN OR FEEDSTUFFS WHEN USED AS DIRECTED.

FLAT STORAGE

When used as a fine mist or heavy-density fog the killing power of SURFASPRAY is at its best. These swirling mists radiate in all directions from the fogging device, penetrating the tiny cracks and crevices where insects seek refuge. Proper application of sufficient quantities of SURFASPRAY will coat with a residual chemical film all surfaces with which it comes in contact. Whether used to blanket the surface of stored grain in upright bins, or tanks, or over vast exposed areas of grain in flat storage, SURFASPRAY used at the rate of one gallon per 750 square feet, kills worms (insect larvae), weevils, grain borers, cadelle beetle, braa bugs, moths, and certain other insects in exposed or accessible stages on the surface. Extremes of temperature or atmospheric conditions may lessen the length of time or degree of effectiveness.

FLOUR AND FEED MILLS

SURFASPRAY may be sprayed on the outer surfaces of all processing and conveying machinery. Some mills follow a regular weekly or bi-monthly spraying program as an inexpensive insurance against insect infestation.

BOXCARS AND TRUCKS

After thoroughly cleaning walls, ceilings, and floors of boxcars or trucks, spray with SURFASPRAY. Time permitting this operation produces better results if the boxcar or truck is not used to receive grain or feedstuffs for a few hours.

GRAIN ELEVATORS

If grain is to be held in a tank or bin for a few weeks or more, apply SURFASPRAY to the surface of the grain and all areas above the grain (walls, overhead, trusses, girders, braces, etc.) thereby forming a chemical barrier against movement or migration of bugs on or above the grain surface.

WAREHOUSES

Grain warehouses can use SURFASPRAY to advantage to control insect problems. Used as a space as well as surface spray, after applying close the area for at least 30 minutes if possible. Rate of application 1 gallon SURFASPRAY per 10,000 cubic feet.

CONTAINER DISPOSAL

Do not reuse empty container. Wash thoroughly with water and detergent. Discard in a safe place.

SURFASPRAY

DIRECTIONS

STANDARD DOSAGE . . . One gallon SURFASPRAY per 750 square, or 10,000 cubic feet is the recommended dosage. Use electrical, mechanical, compressed air, power or hand sprayer or fogging unit. A heavy-density fog or fine mist will penetrate cracks, crevices, and coat ledges, cross-beams, columns, trusses, walls, overheads, bulkheads, etc. A course spray will soak walls or sides of bins, tanks, jack-walls, etc. Areas, bins, tanks, buildings, or equipment should be cleaned as thoroughly as possible and excessive quantities of dirt and dusts removed before applying SURFASPRAY. Use whatever type equipment you prefer for application, but insure thorough wetting of surfaces. Apply SURFASPRAY wherever insects are known or suspected to crawl or fly. Spray the outer surfaces and accessible inner surfaces of conveying and processing machinery. Pay particular attention to cracks, corners, and joints. Use SURFASPRAY, not to exceed 1 gallon per 750 square feet, may be used directly on the surface of stored grain or other sacked or bulk feed in storage.

NOTE: SURFASPRAY will control only the exposed stages of the insects listed. It is a supplement to, and not a replacement for regular fumigation practices.

WARNING

This product is combustible. Do not spray it into or near open flame. Harmful if swallowed. Store in cool place. May be absorbed through skin. Avoid inhalation and skin contact. In case of contact, wash immediately with soap and water. Do not use on household pets or humans.

IMPORTANT NOTICE

We warrant solely that this product contains the materials shown in panel listing ingredients. Seller makes no warranty, expressed or implied concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is not in strict accordance with label instructions.
